This image shows a severely damaged document page. The paper is off-white with dark, heavy noise and artifacts throughout. Large, solid black rectangular blocks are placed over several sections of the text, obscuring them completely. The remaining visible text is extremely faint and illegible, appearing as dark grey smudges and speckles against the lighter background. There is no readable content.

Foreword

MMWR Summary of Notifiable Diseases, United States, 1991

This publication contains summary tables of the official statistics for calendar year 1991 on the occurrence of notifiable diseases in the United States. This information is collected and compiled from reports to the National Notifiable Diseases Surveillance System (NNDSS).

Part 1 contains information on morbidity for each of the 49 currently notifiable conditions. Lyme disease and *Haemophilus influenzae* (invasive disease) have been added to the list of notifiable conditions for 1991. In all tables, leprosy is listed as Hansen disease; typhus fever, flea-borne, as murine typhus fever; and, typhus fever, tick-borne, as Rocky Mountain spotted fever (RMSF). The tables show the number of cases of notifiable diseases reported to the Centers for Disease Control (CDC) for 1991, as well as the distribution of cases by month, geographic location, patient's age, and race/ethnicity.

Part 2 contains graphs and maps depicting summary data for many of the notifiable conditions described in tabular form in Part I.

Part 3 includes tables showing the number of notifiable diseases reported to CDC and to the National Office of Vital Statistics since 1942. It also includes a table of deaths associated with specified notifiable diseases reported to the National Center for Health Statistics, CDC, for the period 1980-1989.

Data Sources

Data on the reported occurrence of notifiable diseases are routinely published in the *MMWR* and compiled in final form in this summary from electronic data transmitted by the state and territorial departments of health through the National Electronic Telecommunications System for Surveillance (NETSS).

Notifiable disease reports published in the *MMWR* are the authoritative and archival counts of cases. Data from surveillance records for selected diseases, which are useful for detailed epidemiologic analyses, are published on a periodic basis. Data appearing in those surveillance reports may not agree exactly with reports published by the *MMWR* because of differences in timing of reports or because of refinements in case definition.

The Epidemiology Program Office gratefully acknowledges the CDC units listed below for their contributions of statistical data from surveillance program records. Requests for further information regarding these data should be directed to the appropriate source.

National Center for Infectious Diseases

Division of Bacterial and Mycotic Diseases (cholera and toxic-shock syndrome)

Division of HIV/AIDS (human immunodeficiency virus/acquired immunodeficiency syndrome)

Division of Vector-Borne Infectious Diseases (arboviral infections of the central nervous system and plague)

Division of Viral and Rickettsial Diseases (animal rabies)

National Center for Prevention Services

Division of Quarantine (cholera and plague)

Division of Tuberculosis Elimination (tuberculosis)

Division of Sexually Transmitted Diseases and HIV Prevention (gonorrhea, syphilis, chancroid, granuloma inguinale, and lymphogranuloma venereum)

National Center for Health Statistics

Division of Vital Statistics (deaths from selected notifiable diseases)

Totals for the United States, unless otherwise stated, do not include data for American Samoa, Guam, Puerto Rico, the Virgin Islands, and the Commonwealth of the Northern Mariana Islands (CNMI).

Data on notifiable diseases before 1960 are obtained from publications of the National Office of Vital Statistics.

Population estimates for states are from the July 1, 1991, estimates by the U.S. Bureau of the Census, Population Division, Population Estimates Branch, Press Release CB91-346. Resident population, by age, sex, race, and Hispanic origin, April 1, 1990, are from Bureau of the Census, *1990 Census of Population, CPH-L-74*.

Population estimates for territories are from the 1990 census, U.S. Bureau of the Census, Press Releases CB91-142, 242, 243, 263, and 276.

Population data from states in which diseases were not notifiable or not available were excluded from rate calculation. Rates in the *1991 Summary of Notifiable Diseases* were based on data for the U.S. total resident population.

Interpreting Data

Data in this summary should be interpreted with caution. Some diseases such as plague and rabies that cause severe clinical illness and are associated with serious consequences probably are reported quite accurately. However, diseases such as salmonellosis and mumps that are clinically mild and infrequently associated with serious consequences are less likely to be reported. Additionally, subclinical cases are seldom detected except in the course of special studies. The degree of completeness of reporting is also influenced by the diagnostic facilities available, the control measures in effect, and the interests and priorities of state and local officials responsible for disease control and surveillance. Finally, factors such as the introduction of new diagnostic tests and the discovery of new disease entities may cause changes in disease reporting independent of the true incidence of disease. Despite these limitations, the data in this report have proven to be useful in analyzing trends.

EXPLANATION OF SYMBOLS USED IN TABLES

Data not available	NA
No reported cases	-
Report of disease not required by state health department (not notifiable)	NN

*AIDS total updated through December 31, 1991.

†Cases reported by some states as aggregate only are included in column for age not stated.

‡The total cases reported by age group excludes some cases reported by geographic area. However, in most instances, if age was not specified, cases were prorated according to the distribution of cases for which age was specified. Cases aged 0 to 9 years are not shown because some of these may not be due to sexual transmission; however, they are included in the totals.

*Subject to change due to retrospective case evaluations or late reports.

**Includes 763 cases reported by the state of Texas for ages 15+.

*Numbers in thousands

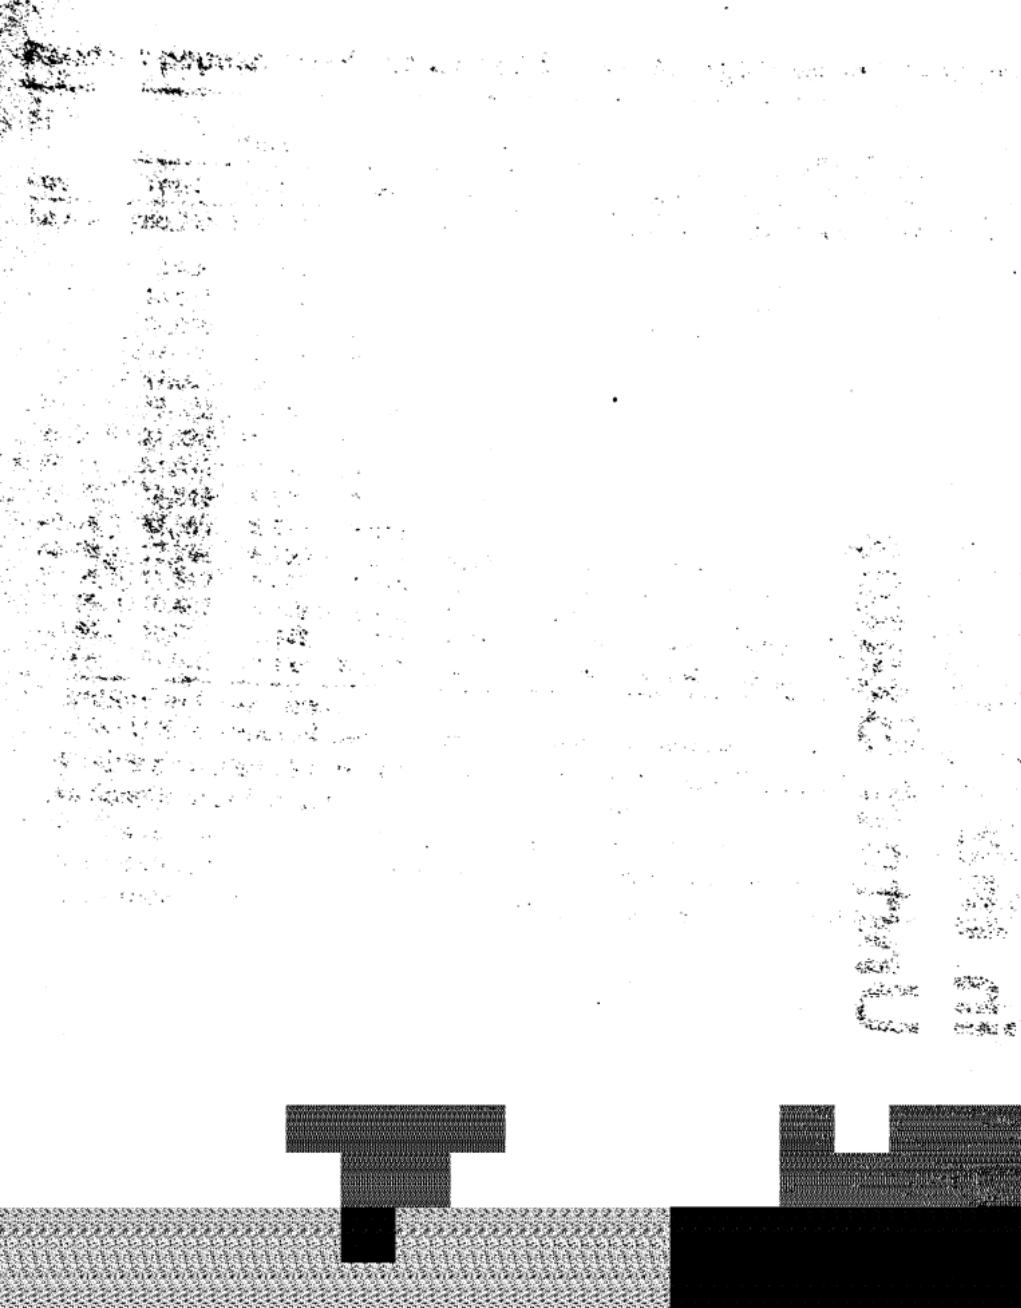

Source: U.S. Bureau of the Census, Current Population Reports, by Age, Sex, and Race, 1990 Census.

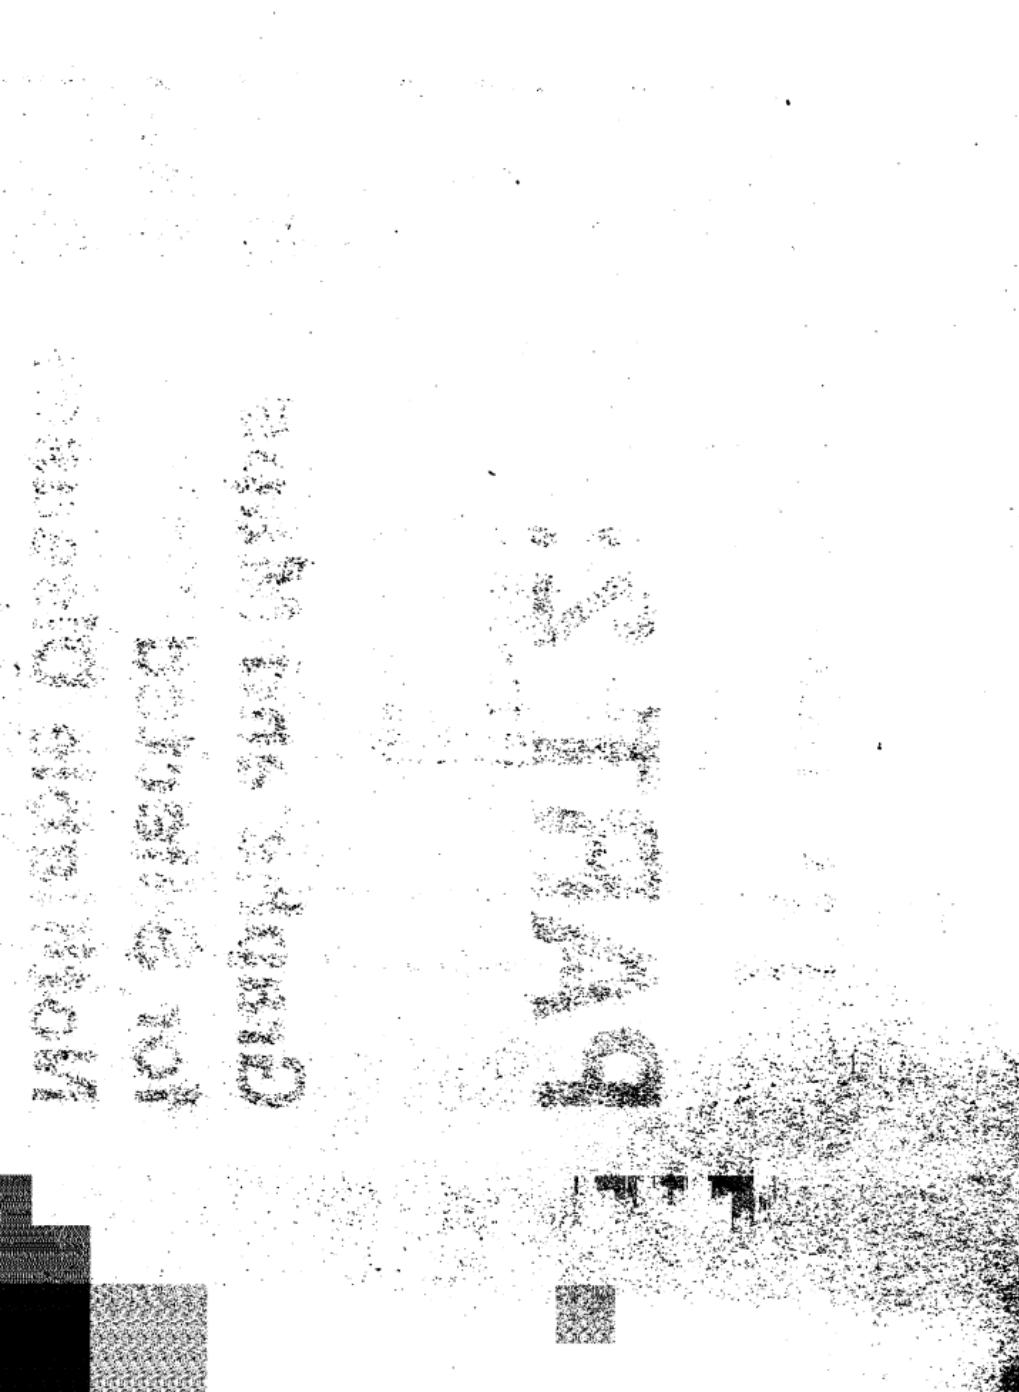

This table provides information from a special census file in which the age and race data have been modified to be consistent with the classification used in some data sets other than the census, while the age data were adjusted to correspond with the April 1, 1990 census date. These "modified" data are consistent with the counts of the 1990 census as enumerated.

Note that the race/ethnicity categories used by the census are not directly comparable with those used in the National Notifiable Diseases Surveillance System in 1991 in which Hispanics were excluded from racial categories.

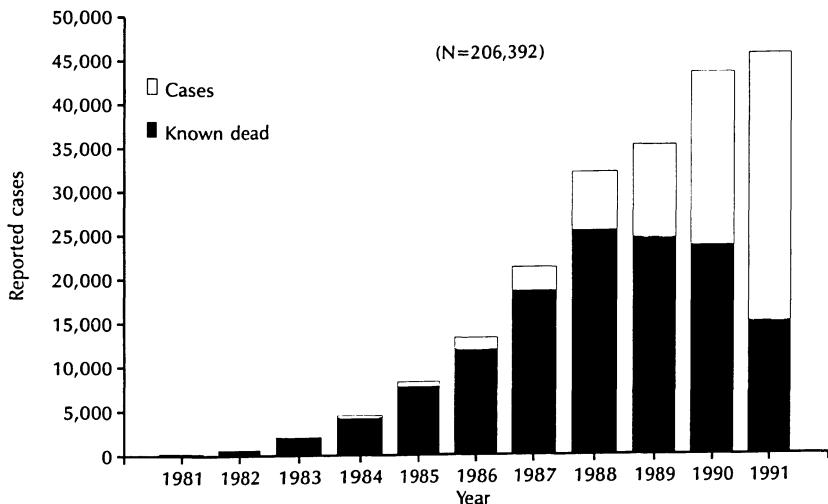

PART 2:

**Graphs and Maps
for Selected
Notifiable Diseases
in the
United States**

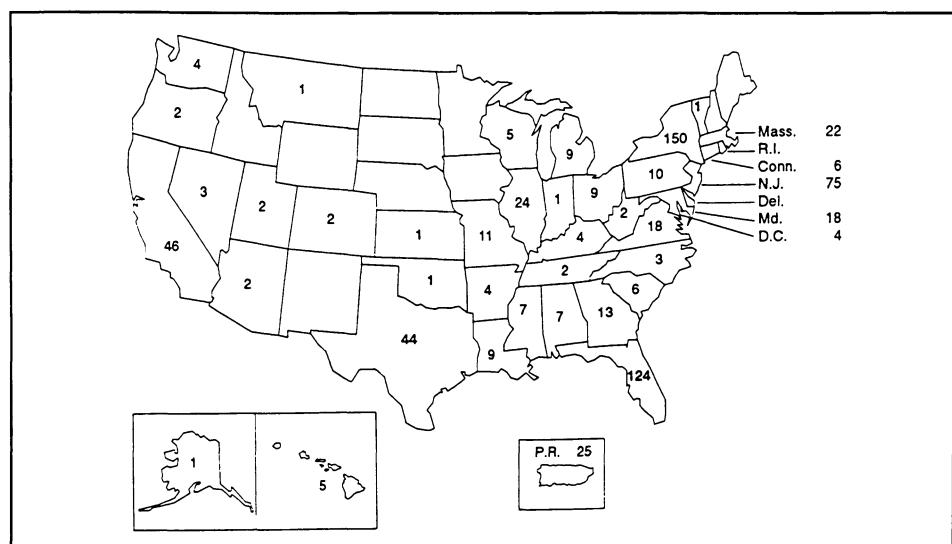

ACQUIRED IMMUNODEFICIENCY SYNDROME (AIDS) — Reported cases and known deaths, by year, United States,* 1981–1991

*Includes Guam, Puerto Rico, the U.S. Pacific Islands, and the U.S. Virgin Islands.

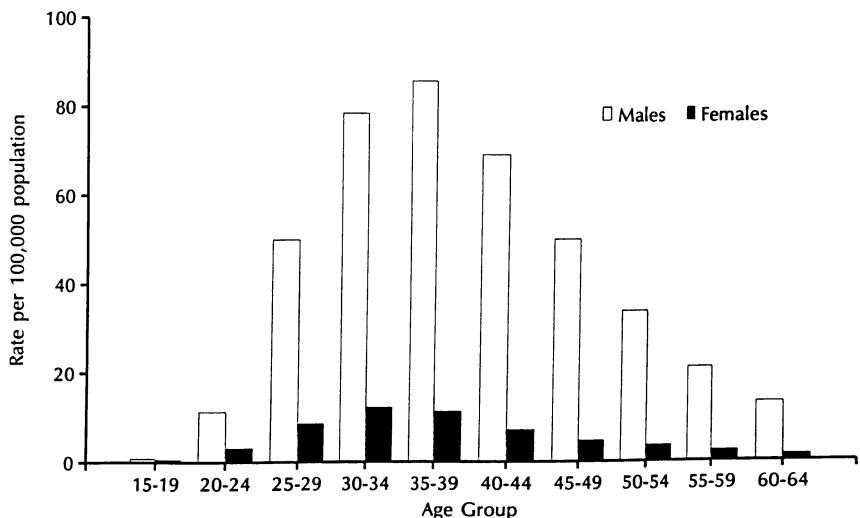

ACQUIRED IMMUNODEFICIENCY SYNDROME (AIDS) — Reported pediatric cases* by year, United States,[†] 1982–1991

*Children less than 13 years old.

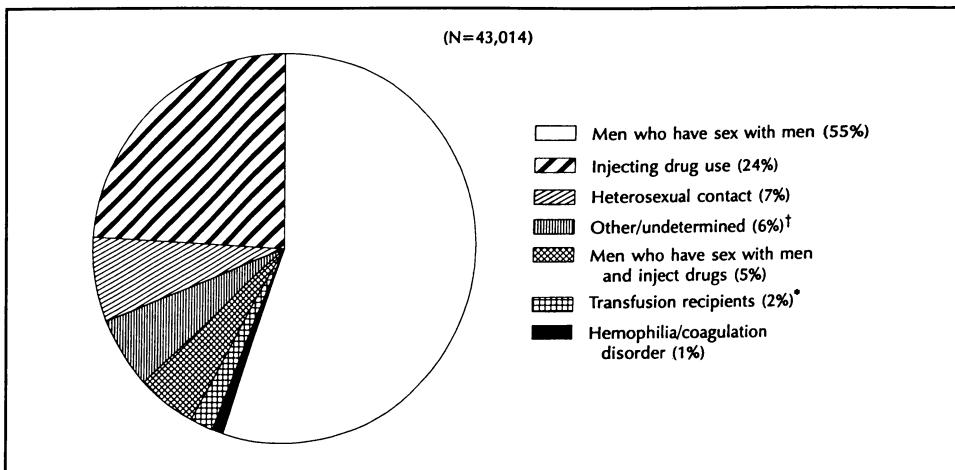

[†]Includes Guam, Puerto Rico, the U.S. Pacific Islands, and the U.S. Virgin Islands.

ACQUIRED IMMUNODEFICIENCY SYNDROME (AIDS) – Annual rates by selected age group and sex for reported cases, United States, 1991*

*Denominators for computing rates are based on extrapolations from U.S. Bureau of the Census population data from the 1980 and 1990 censuses.

ACQUIRED IMMUNODEFICIENCY SYNDROME (AIDS) – Reported adult/adolescent cases, by exposure category, United States, 1991

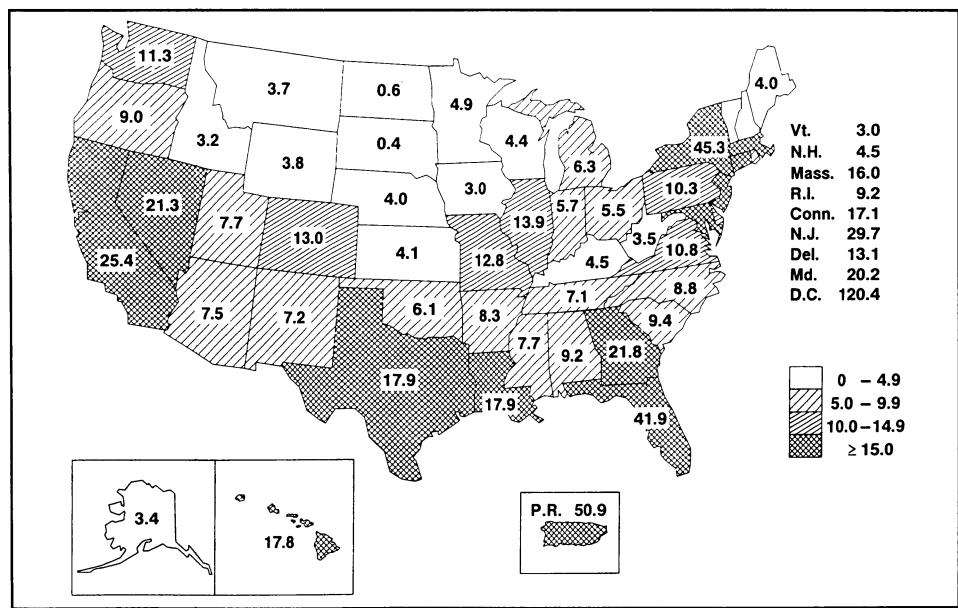

*Includes transfusion, tissue and organ recipients from donors who were screened negative for HIV antibody at the time of donation.

†“Other” refers to persons who developed AIDS after exposure to HIV-infected blood within the health-care setting, as documented by evidence of seroconversion or other laboratory studies.

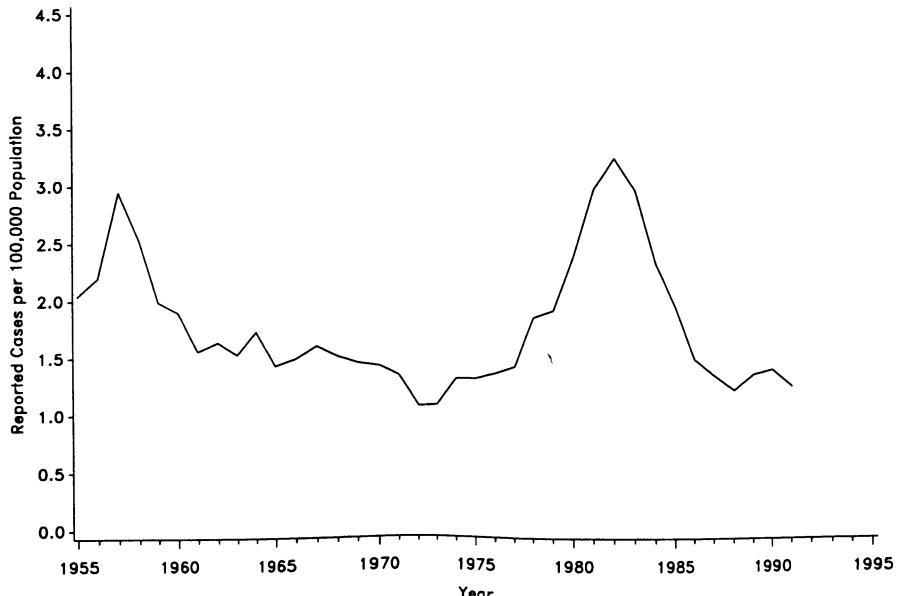

“Undetermined” refers to patients whose mode of exposure to HIV is unknown. This includes patients under investigation; patients who died, were lost to follow-up, or refused interview; and patients whose mode of exposure to HIV remains undetermined after investigation.

ACQUIRED IMMUNODEFICIENCY SYNDROME (AIDS) — Cases per 100,000 population, reported to CDC by state, United States, 1991*

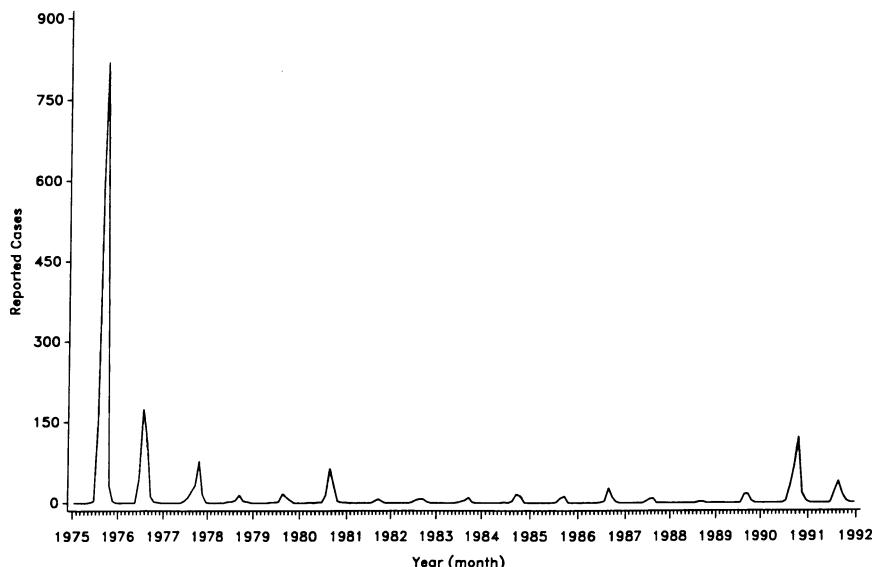

*Denominators for computing rates are based on extrapolations from U.S. Bureau of the Census population data from the 1980 and 1990 censuses.

AMEBIASIS — By year, United States, 1955–1991

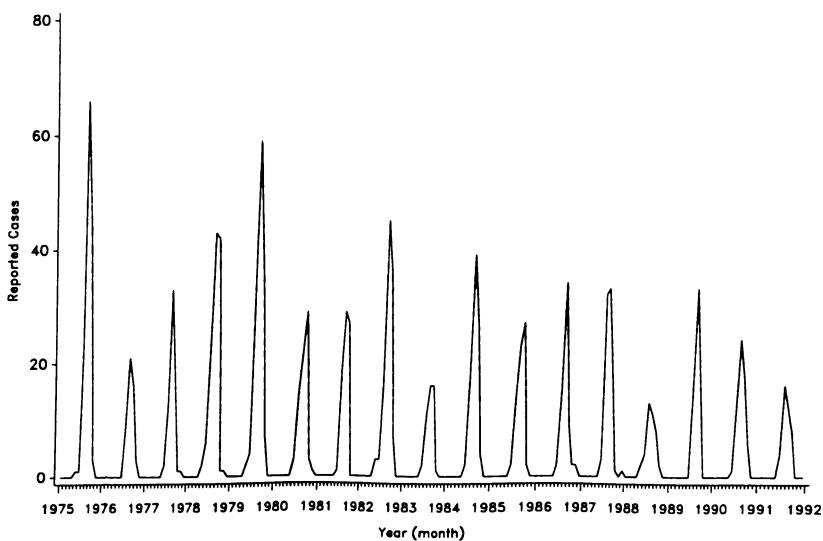

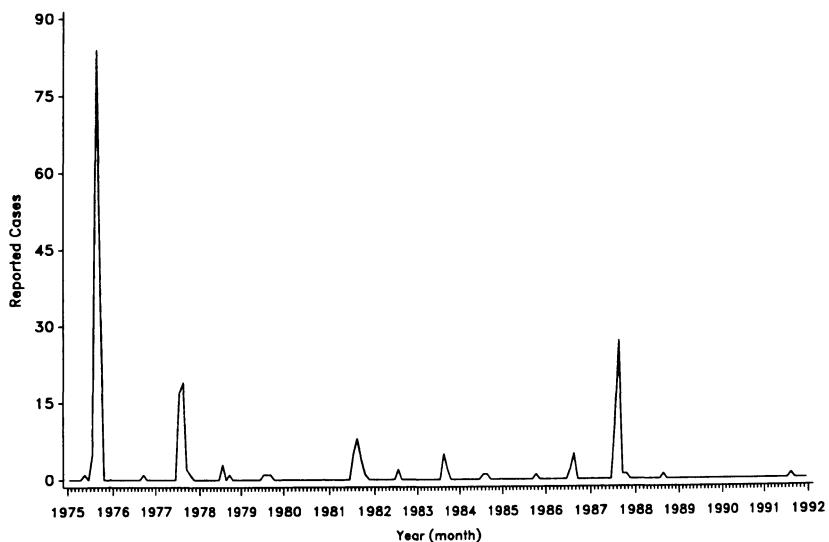

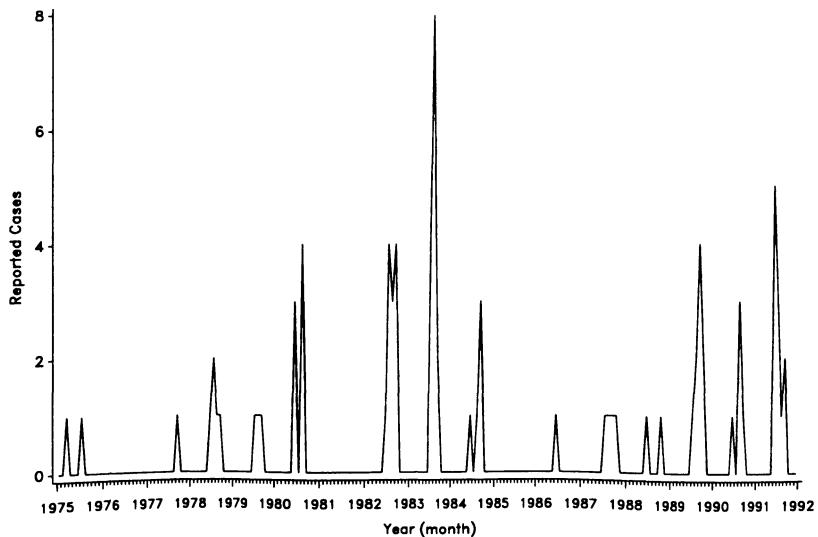

GRAPHS AND MAPS

ARBOVIRAL INFECTIONS (of the central nervous system) – Cases due to St. Louis encephalitis virus, by month, United States, 1975–1991

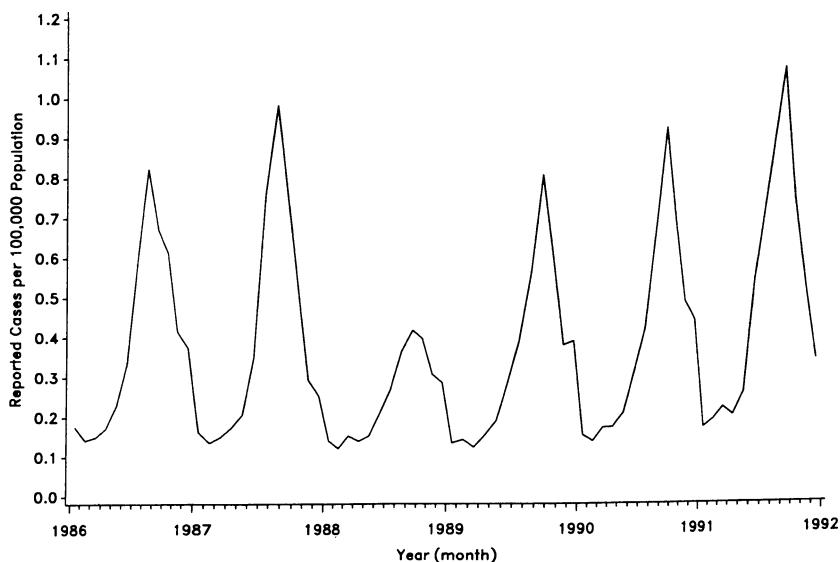

ARBOVIRAL INFECTIONS (of the central nervous system) – Cases due to California serogroup viruses, by month, United States, 1975–1991

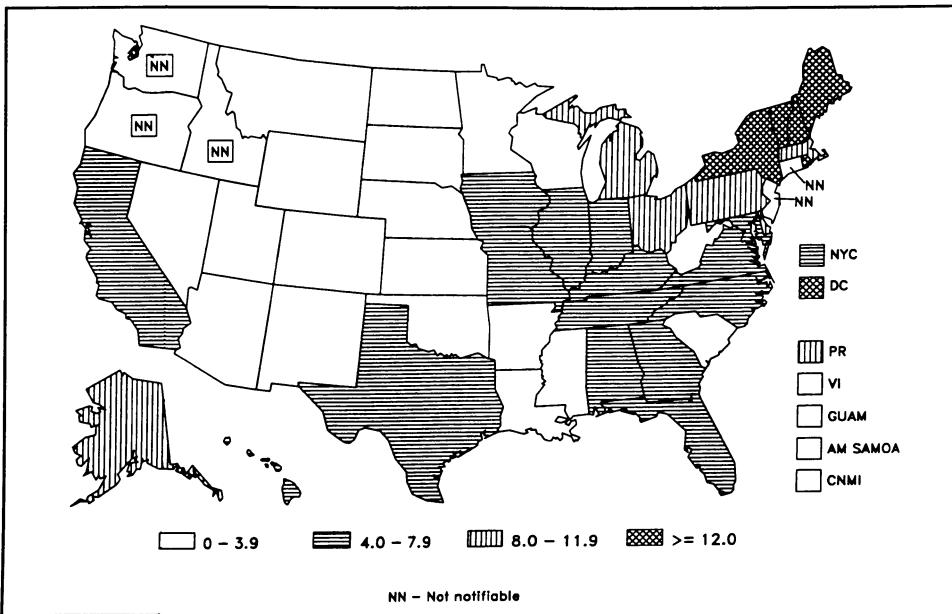

ARBOVIRAL INFECTIONS (of the central nervous system) — Cases due to Western equine encephalitis virus, by month, United States, 1975–1991**ARBOVIRAL INFECTIONS (of the central nervous system) — Cases due to Eastern equine encephalitis virus, by month, United States, 1975–1991**

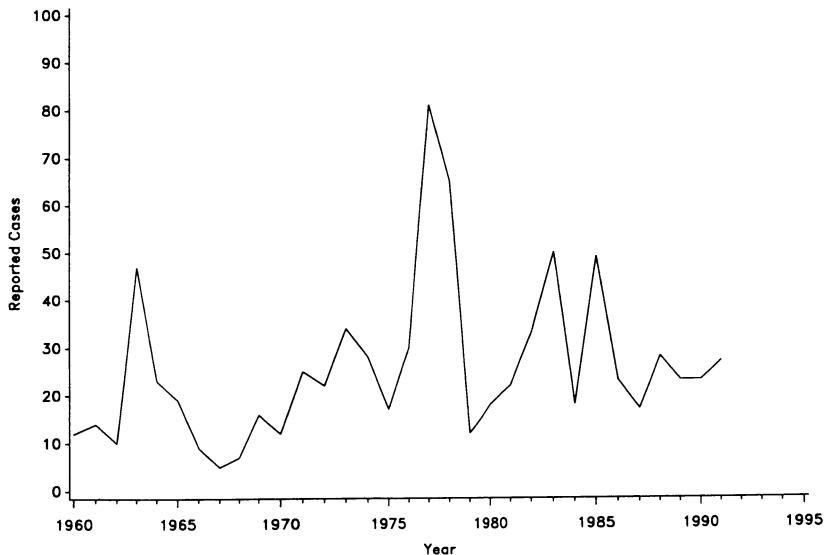

GRAPHS AND MAPS

ASEPTIC MENINGITIS — By month, United States, 1986–1991

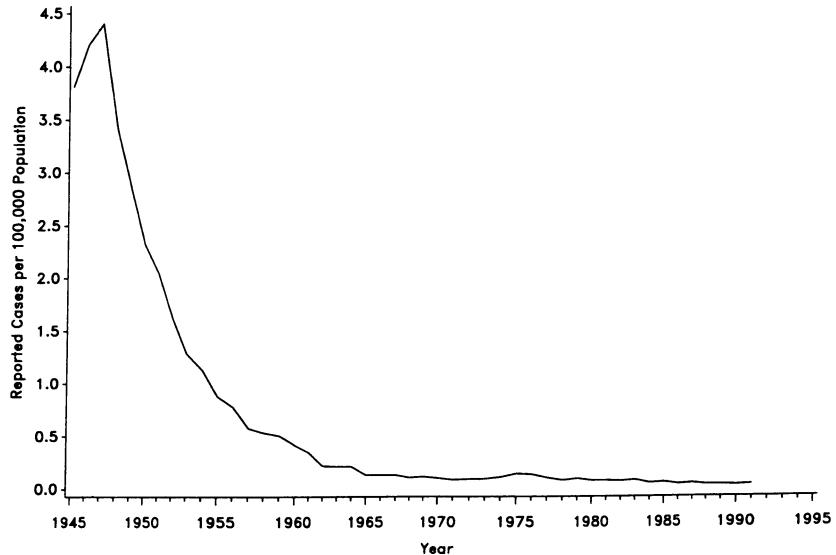

ASEPTIC MENINGITIS — Reported cases per 100,000 population, United States, 1991

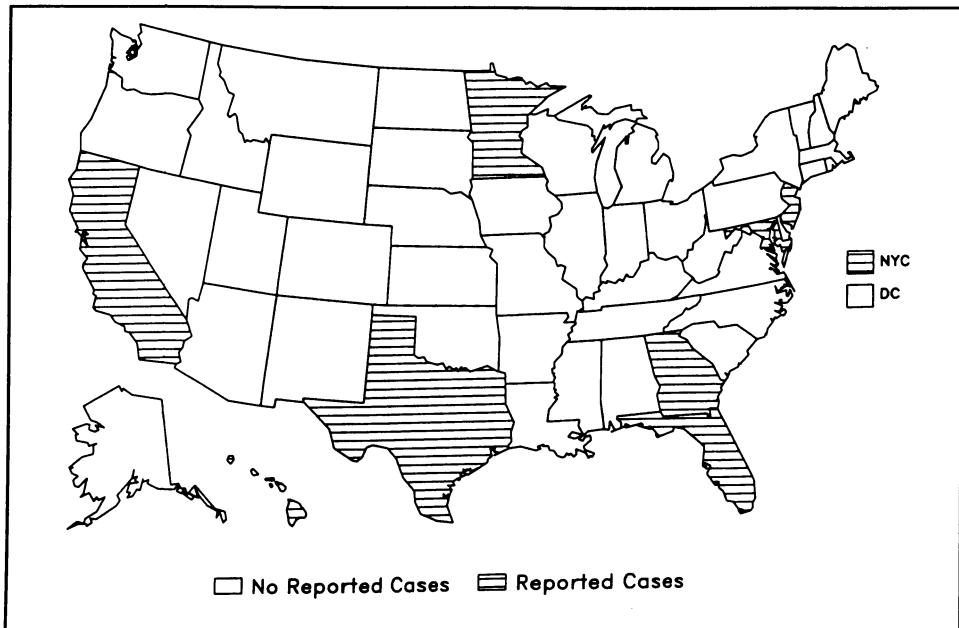

BOTULISM (foodborne) – By year, United States, 1960–1991**BOTULISM (infant) – By year, United States, 1975–1991**

GRAPHS AND MAPS

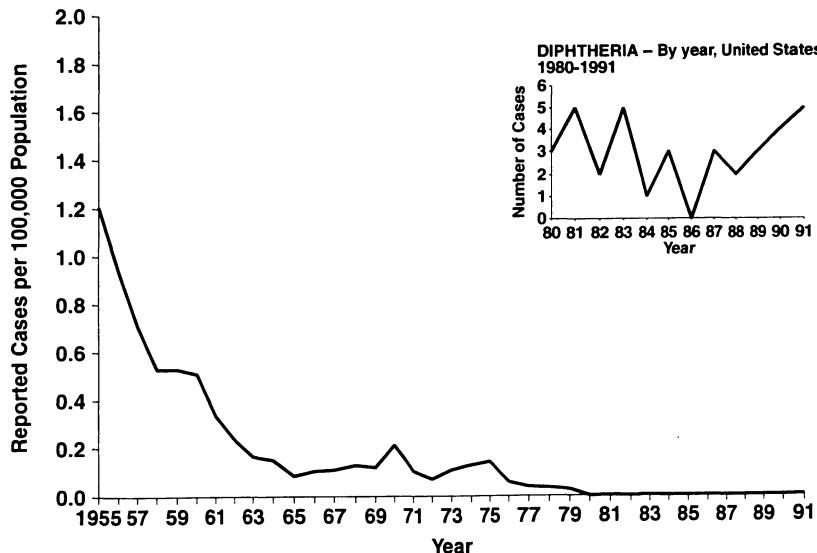

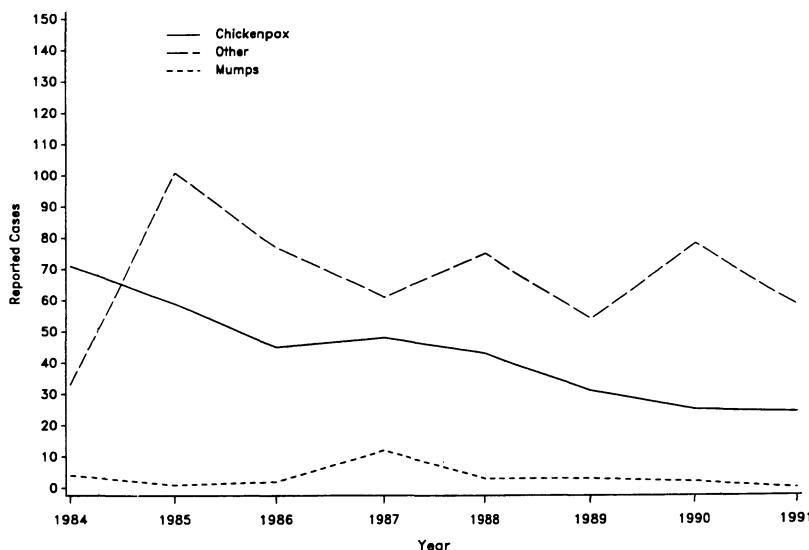

BRUCELLOSIS – By year, United States, 1945–1991

CHOLERA – Reported Cases*, United States, 1991

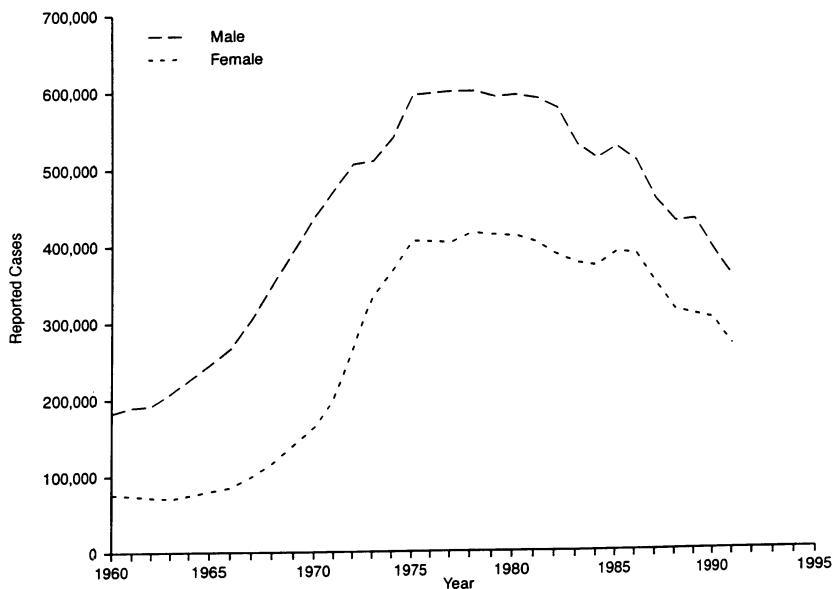

*Includes 10 imported cases

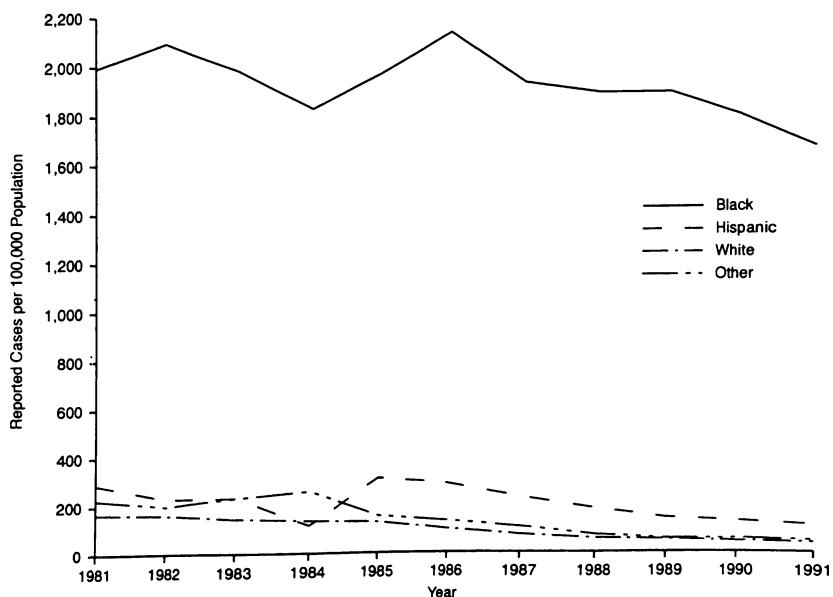

DIPHTHERIA — By year, United States, 1955–1991**ENCEPHALITIS (post-infectious) — By year, United States, 1984-1991**

GRAPHS AND MAPS

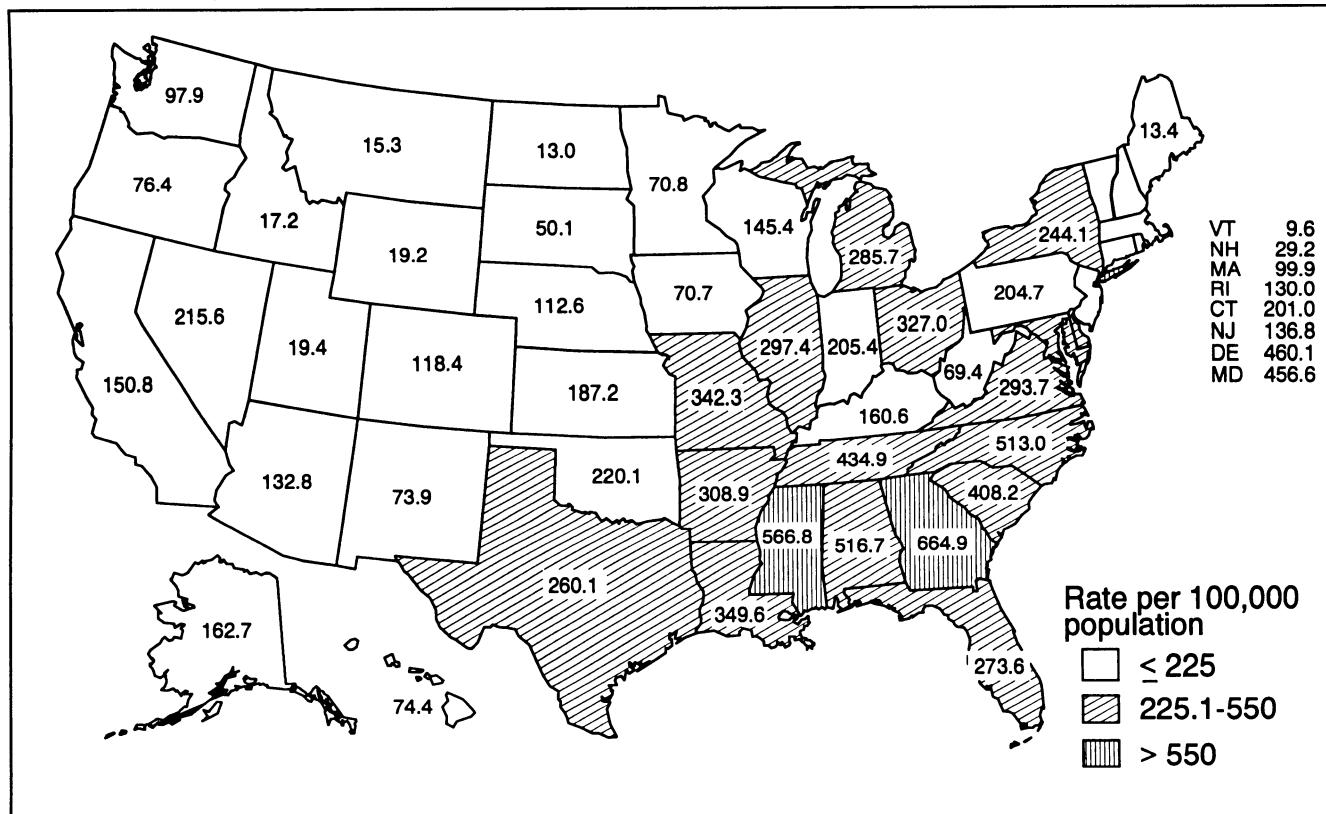

GONORRHEA — By sex, United States, 1960–1991

GONORRHEA — Rates by race and ethnicity, United States, 1981–1991

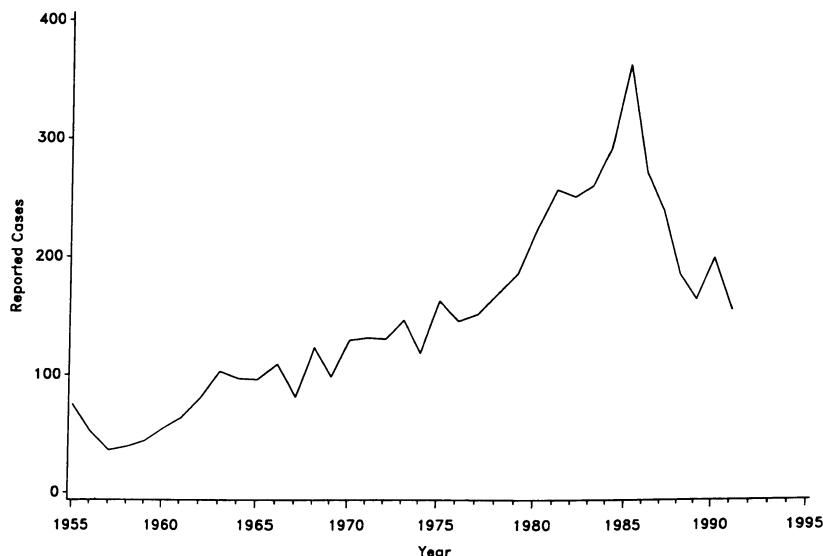

GONORRHEA — By state, United States, 1991

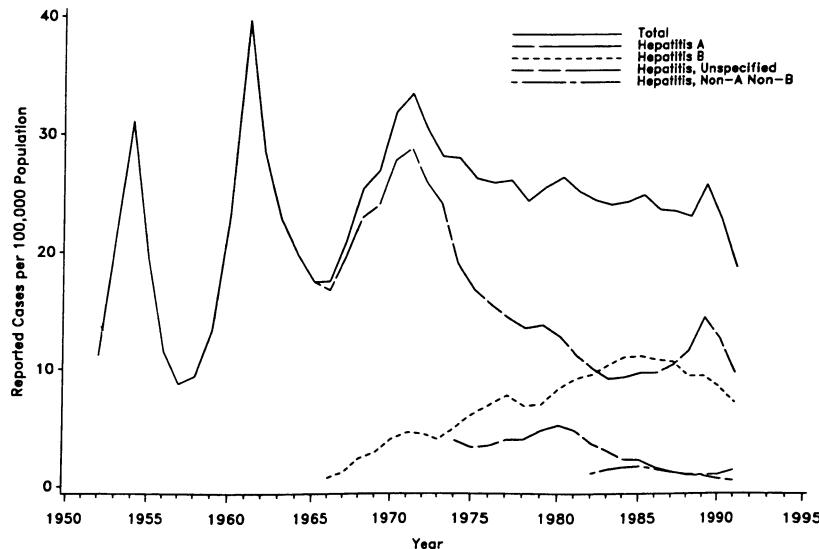

NOTE: The total rate of gonorrhea for the U.S. was 249.5 per 100,000 population. The year 2000 objective is 225 per 100,000 population.

GRAPHS AND MAPS

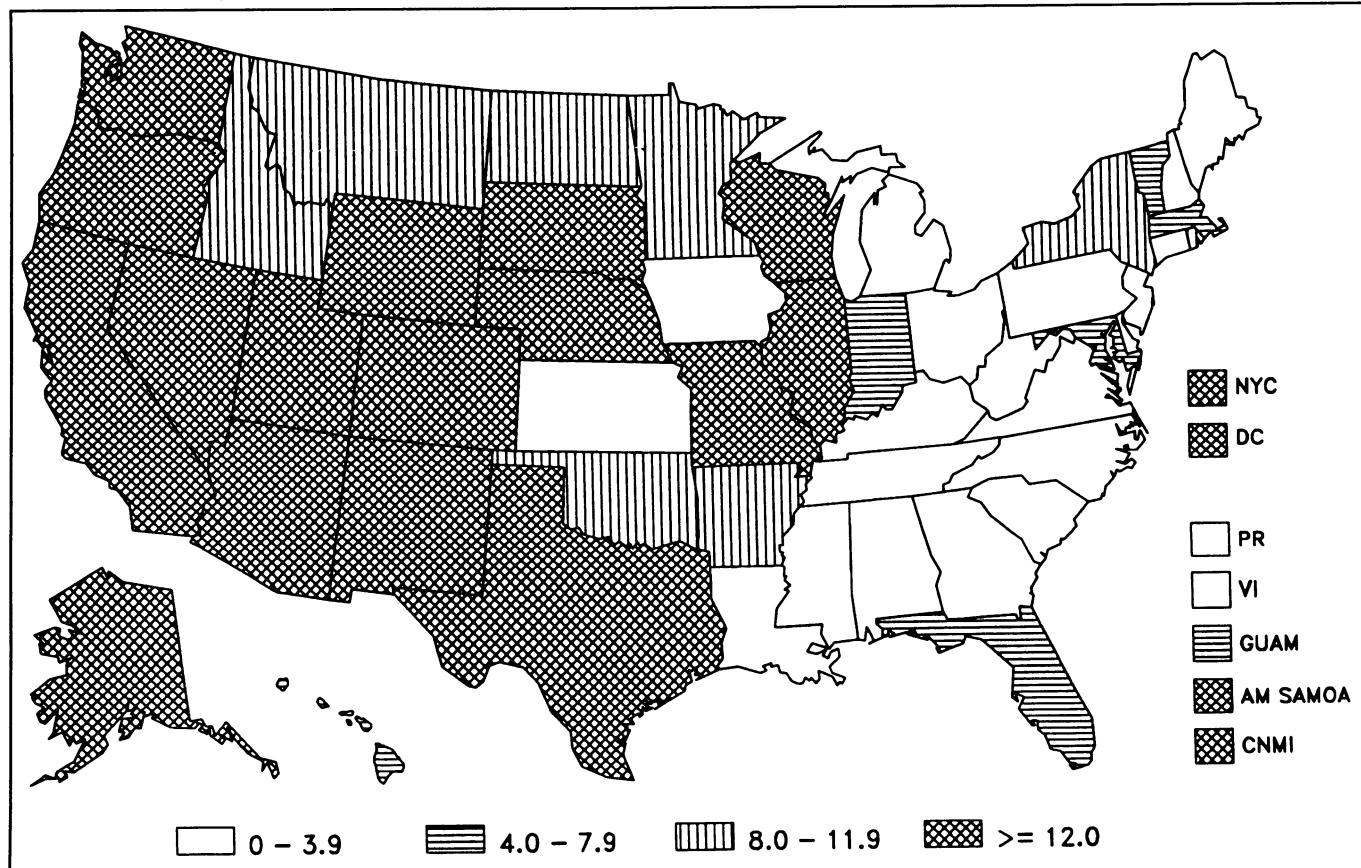

HANSEN DISEASE – By year, United States, 1955–1991

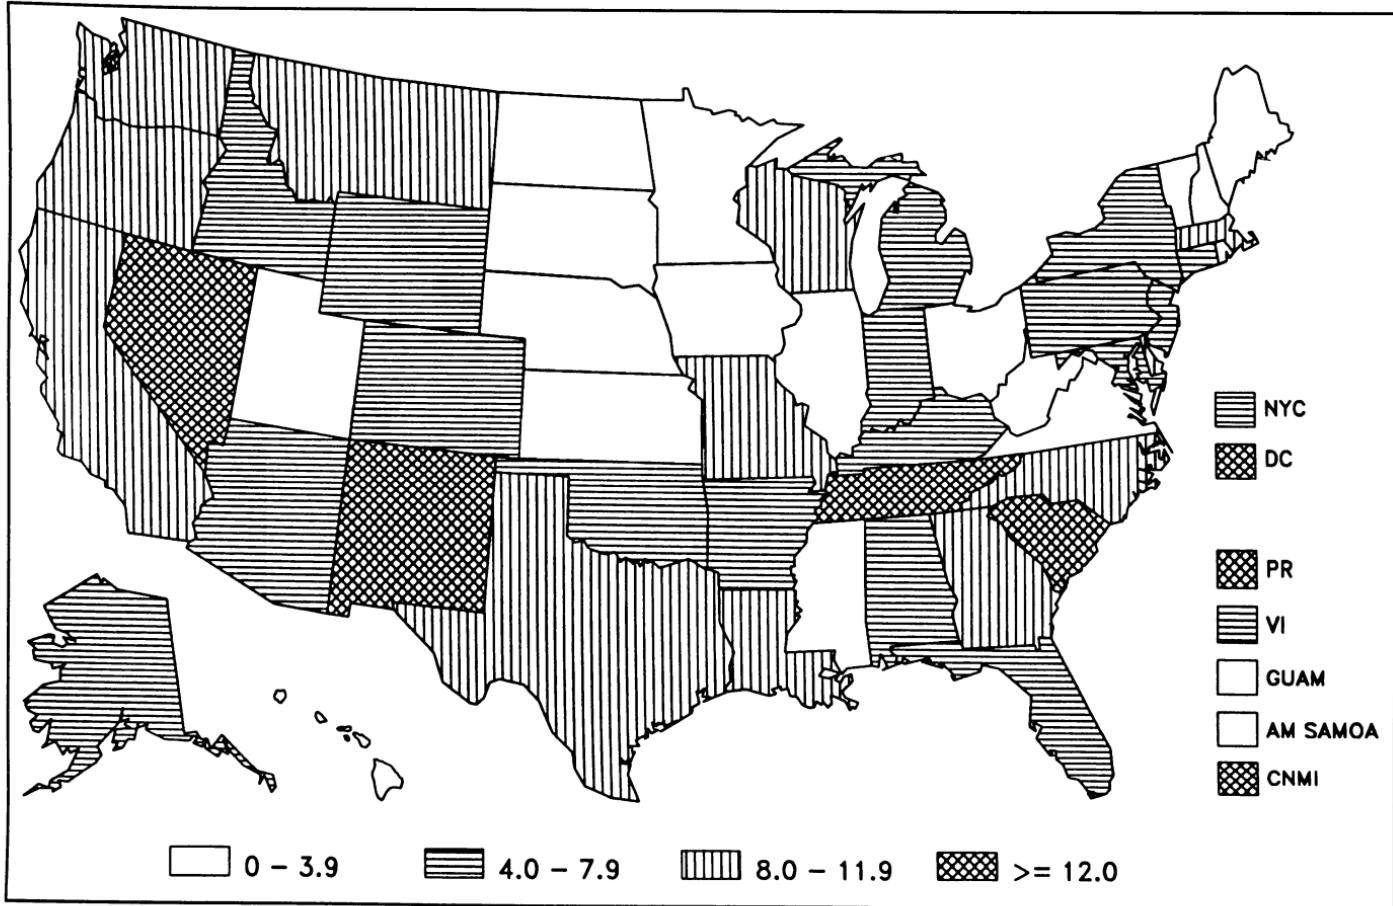

HEPATITIS – By year, United States, 1952–1991

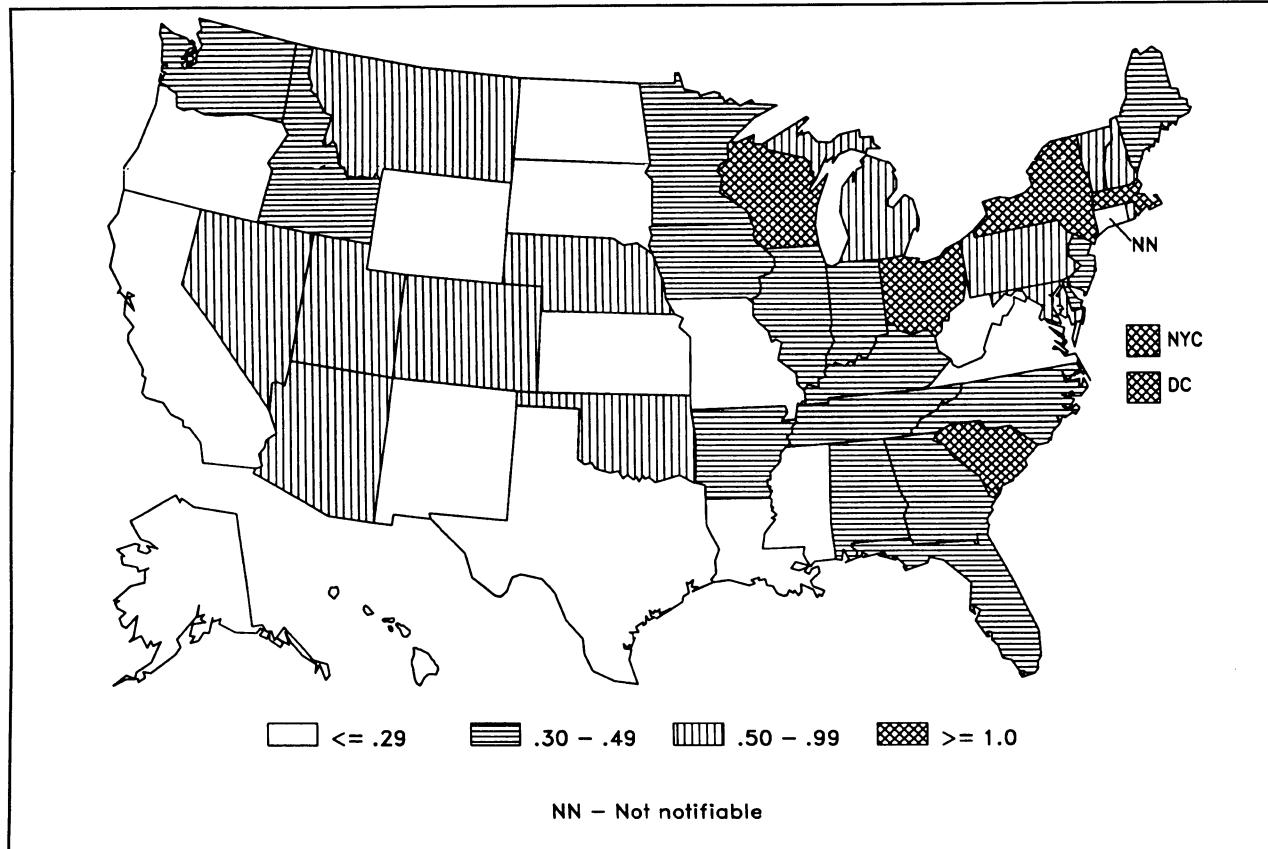

HEPATITIS A — Reported Cases, per 100,000 population, United States, 1991

HEPATITIS B – Reported cases, per 100,000 population, United States, 1991

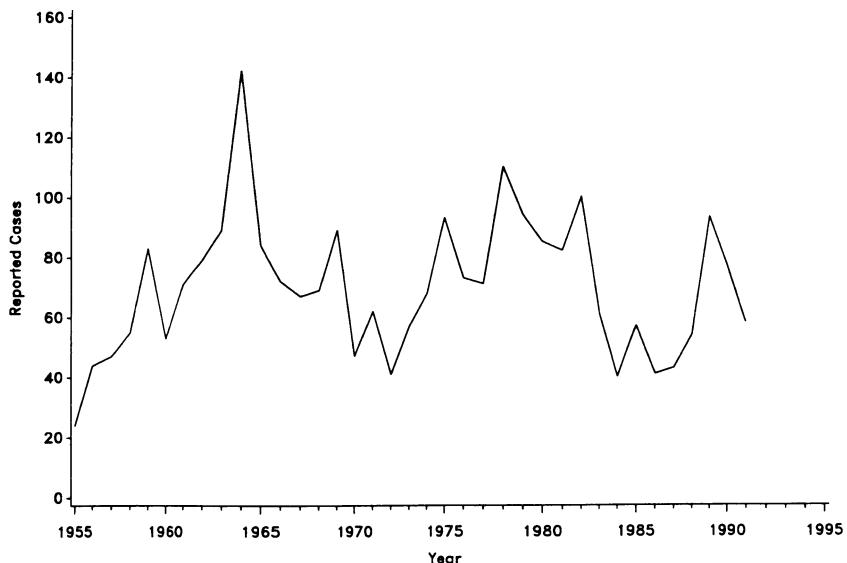

LEGIONELLOSIS – Reported cases, per 100,000 population, United States, 1991

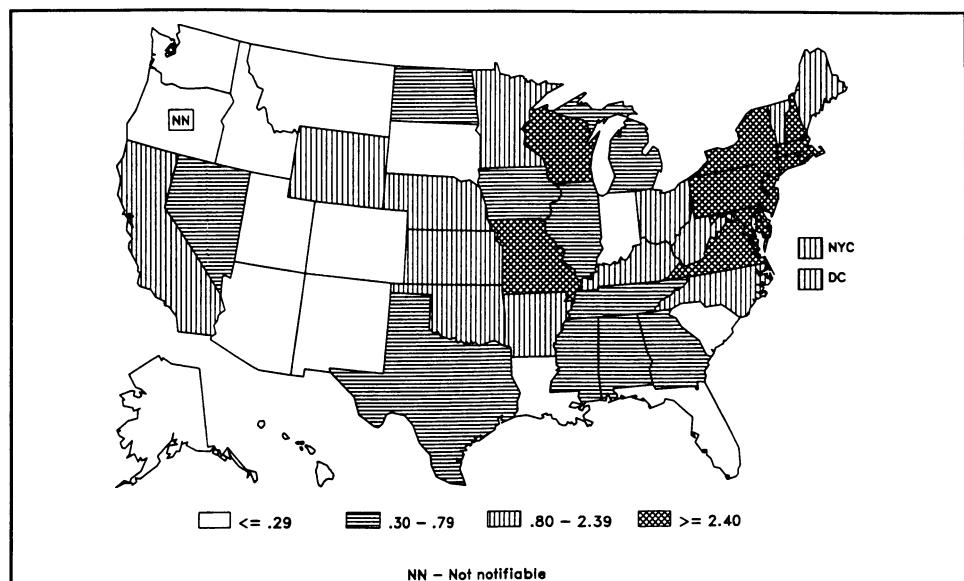

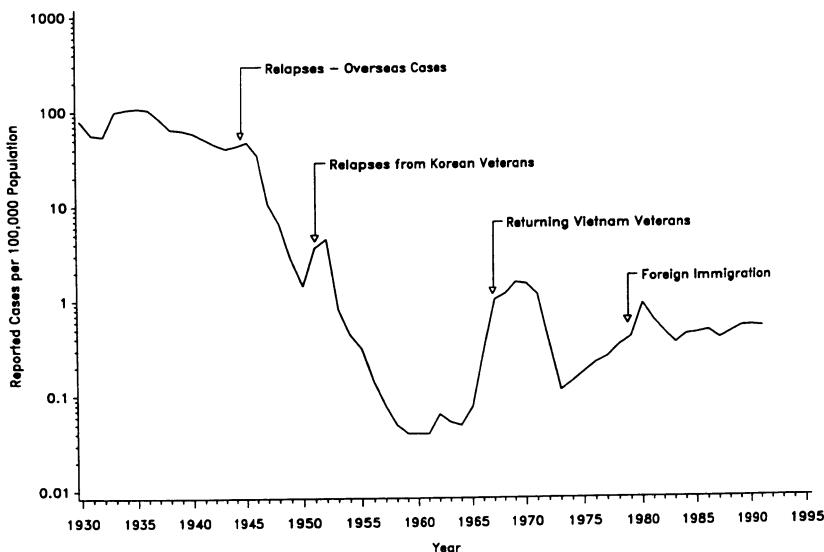

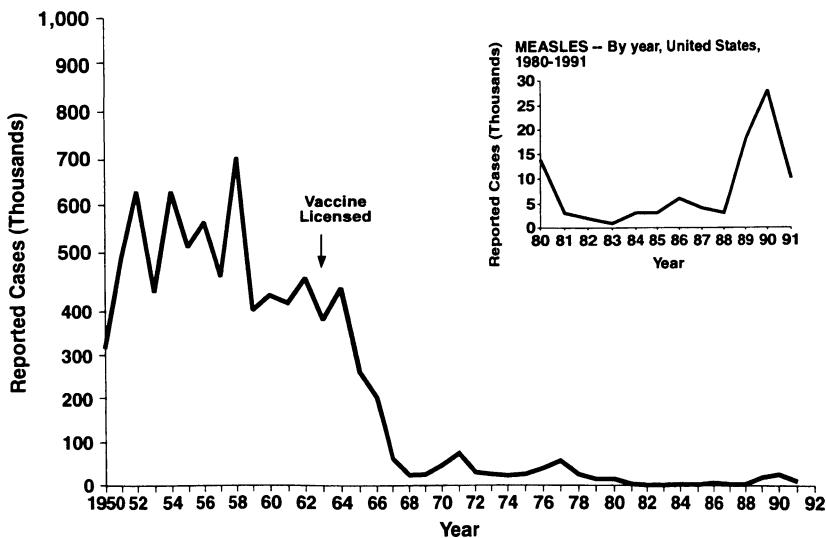

GRAPHS AND MAPS

LEPTOSPIROSIS – By year, United States, 1955–1991

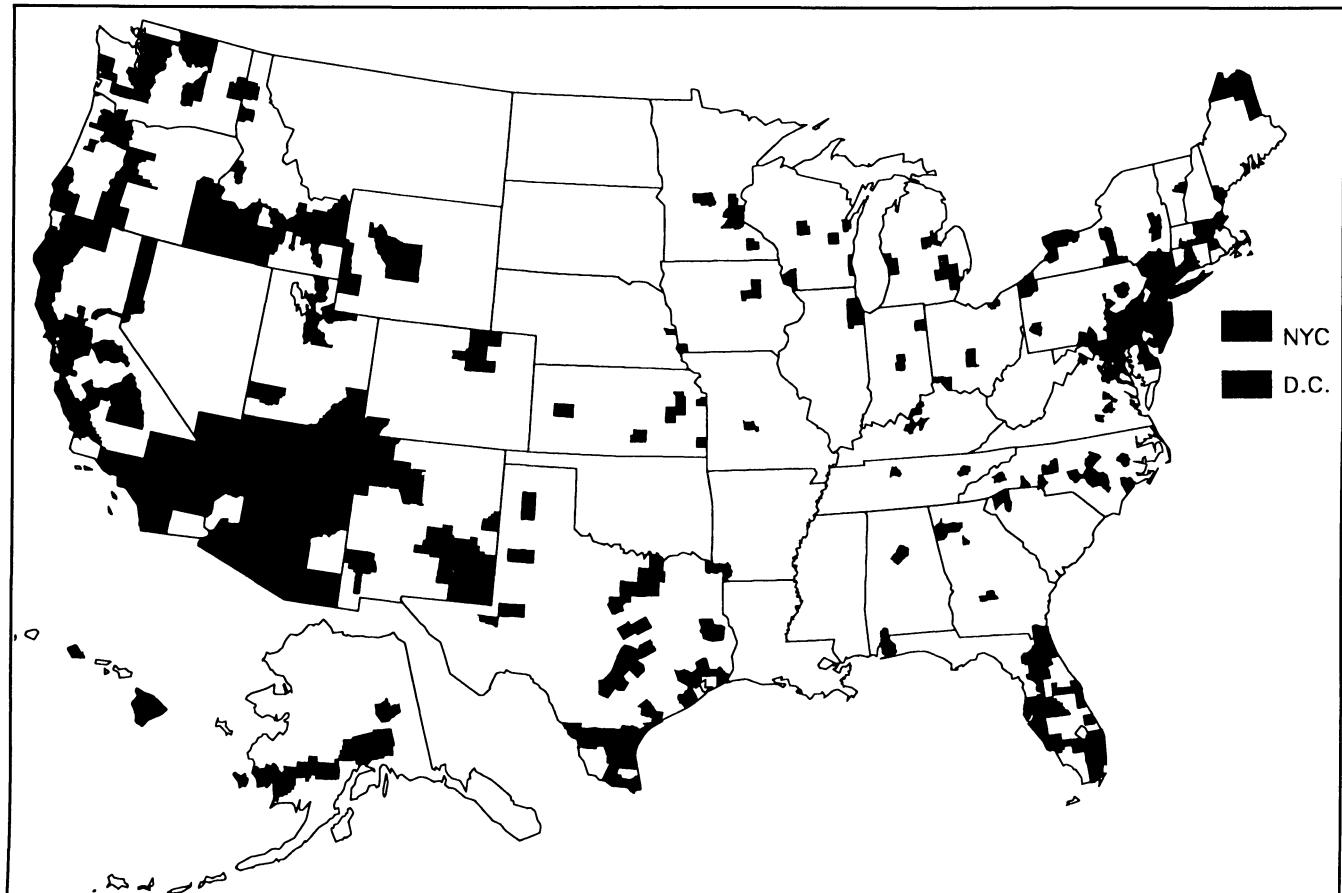

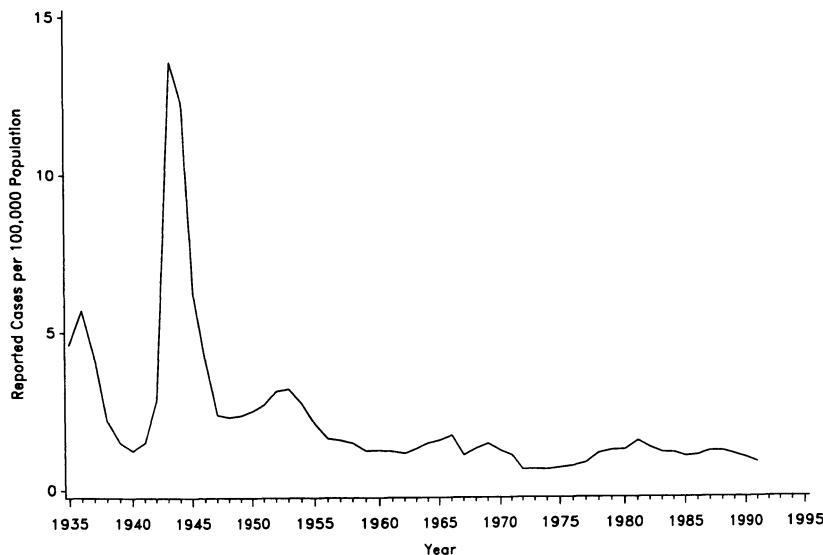

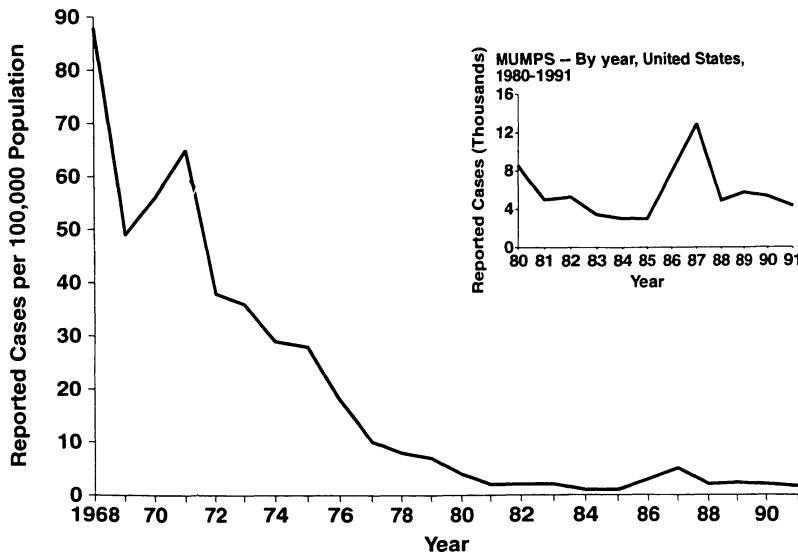

LYME DISEASE – Reported cases, per 100,000 population, United States, 1991

MALARIA — By year, United States, 1930–1991**MEASLES (rubeola) — By year, United States, 1950–1991**

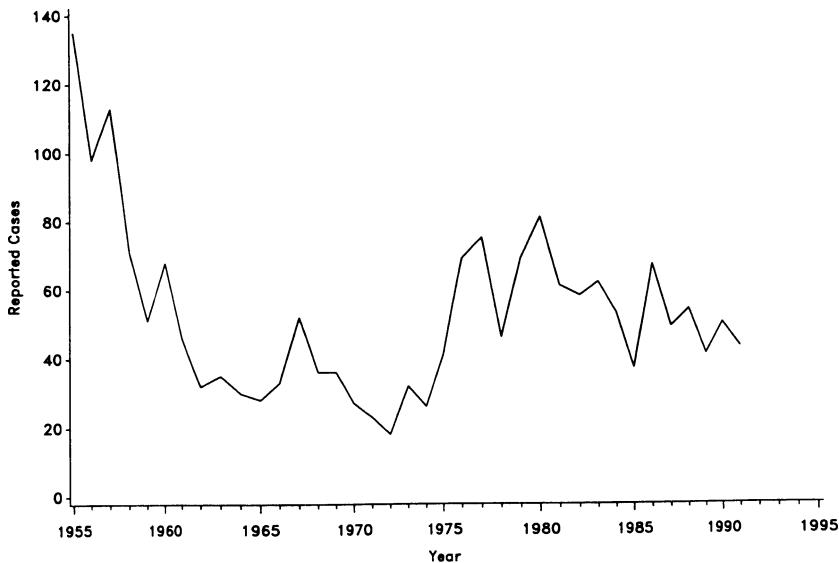

MEASLES (rubeola) — Counties reporting cases, United States, 1991

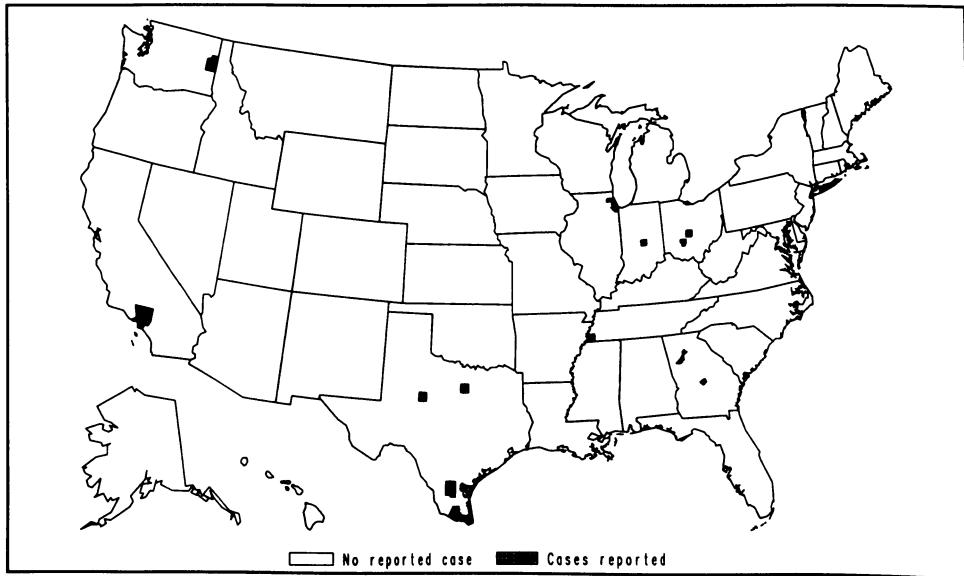

MENINGOCOCCAL INFECTION – By year, United States, 1935–1991**MUMPS – By year, United States, 1968–1991**

GRAPHS AND MAPS

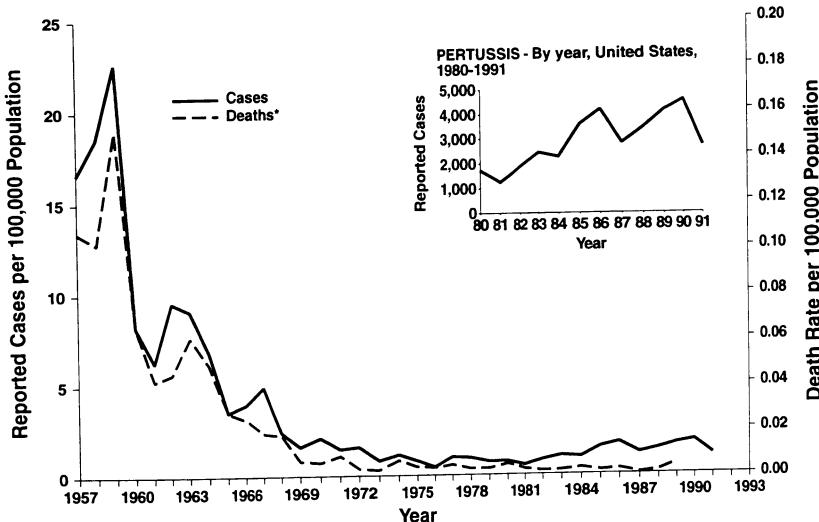

MURINE TYPHUS FEVER — By year, United States, 1955–1991

MURINE TYPHUS FEVER — Counties reporting cases, United States, 1991

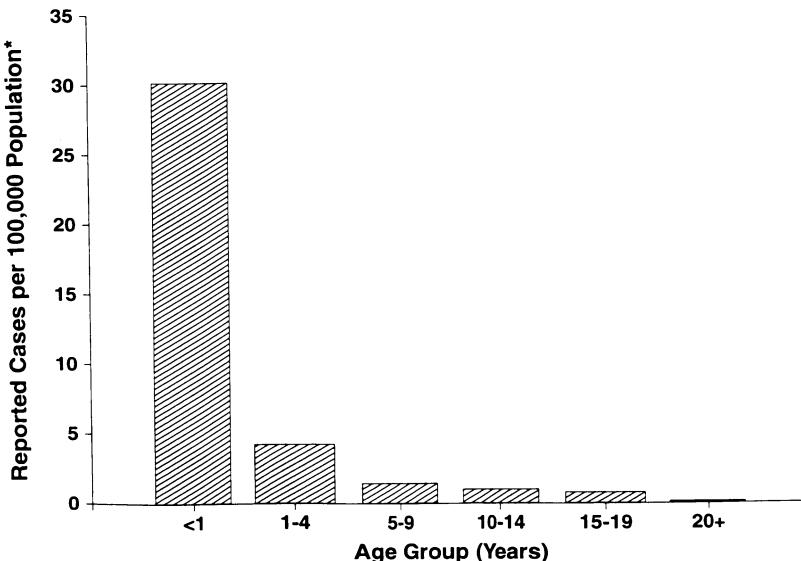

PERTUSSIS (whooping cough) — By year, United States, 1957–1991

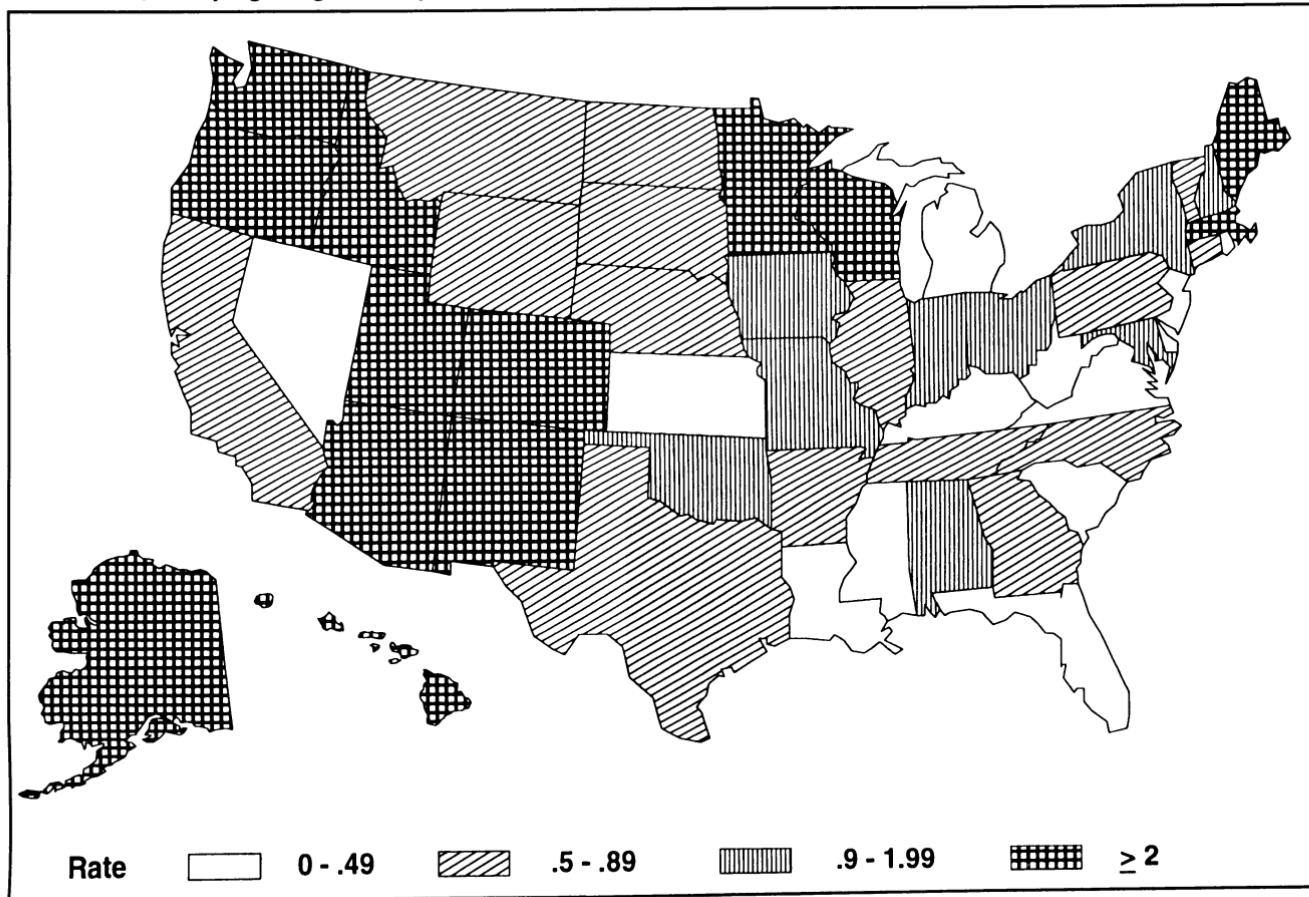

*Data on mortality are not yet available for 1990 or 1991.

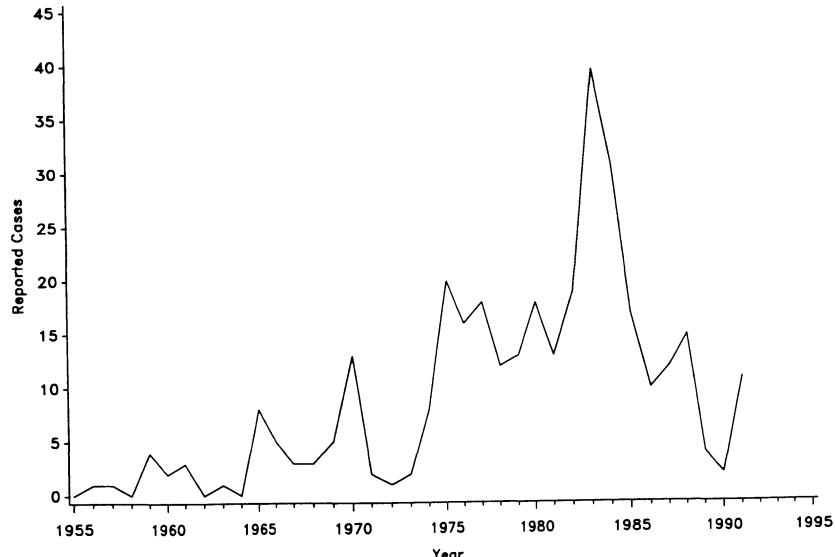

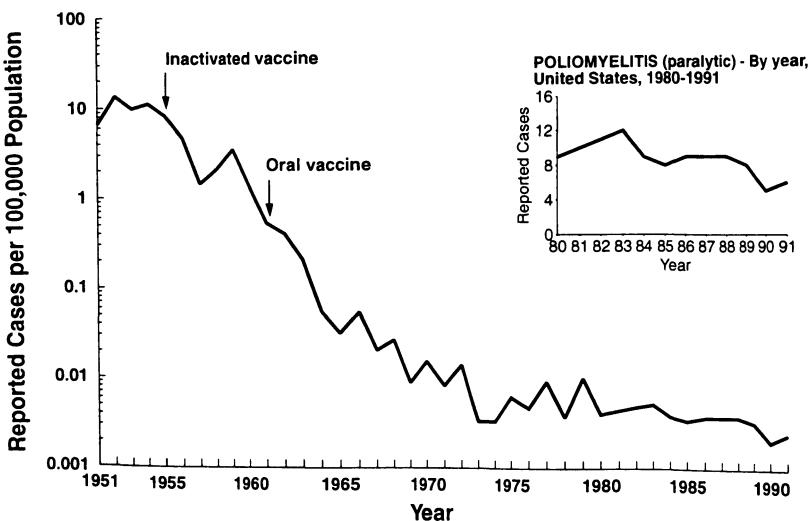

PERTUSSIS (whooping cough) — By age group, United States, 1991

*Rates were calculated by multiplying the percentage of cases with known age group by total reported cases and dividing by the population in that age group. Census population figures modified by age were used for the age groups.

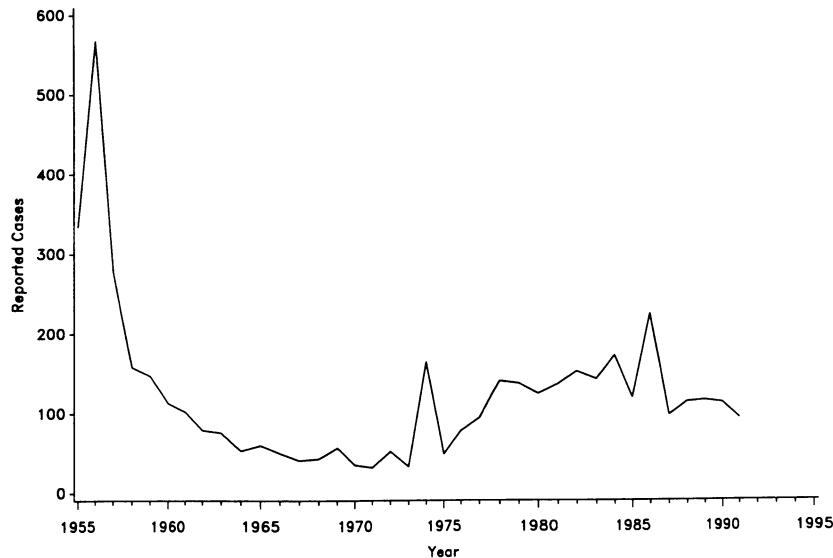

PERTUSSIS (whooping cough) – Reported cases per 100,000 population, United States, 1991

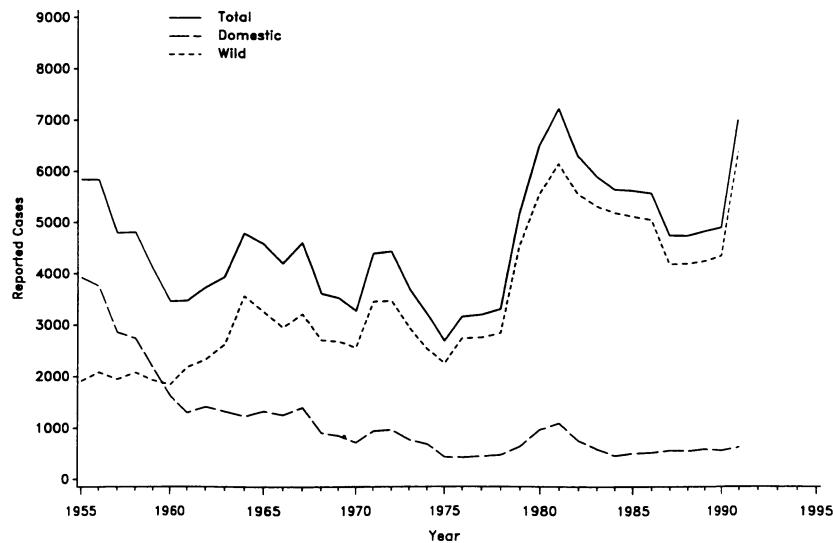

PLAQUE – In humans, by year, United States, 1955–1991**POLIOMYELITIS (paralytic) – By year, United States, 1951–1991**

GRAPHS AND MAPS

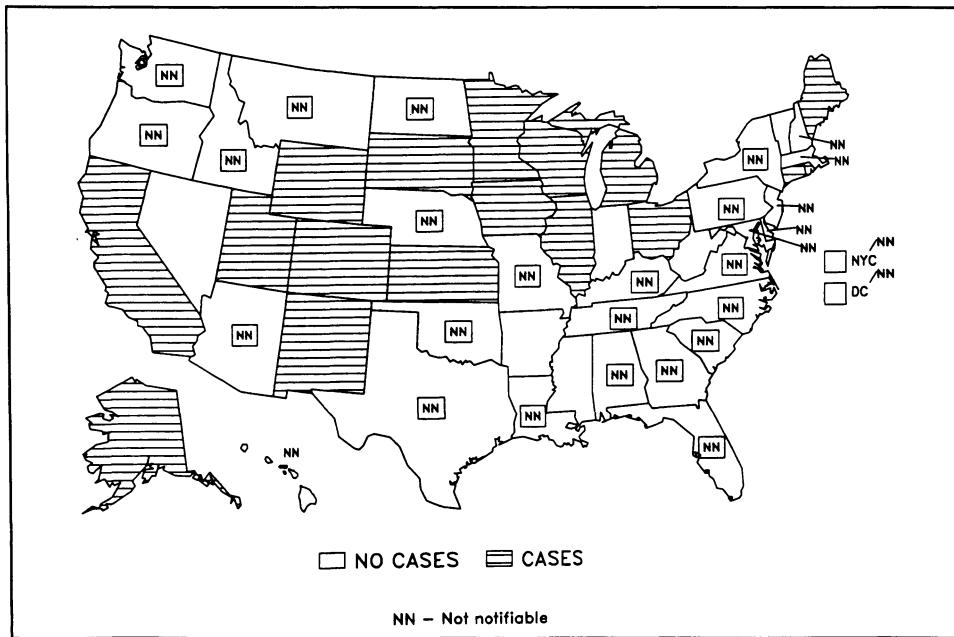

PSITTACOSIS – By year, United States, 1955–1991

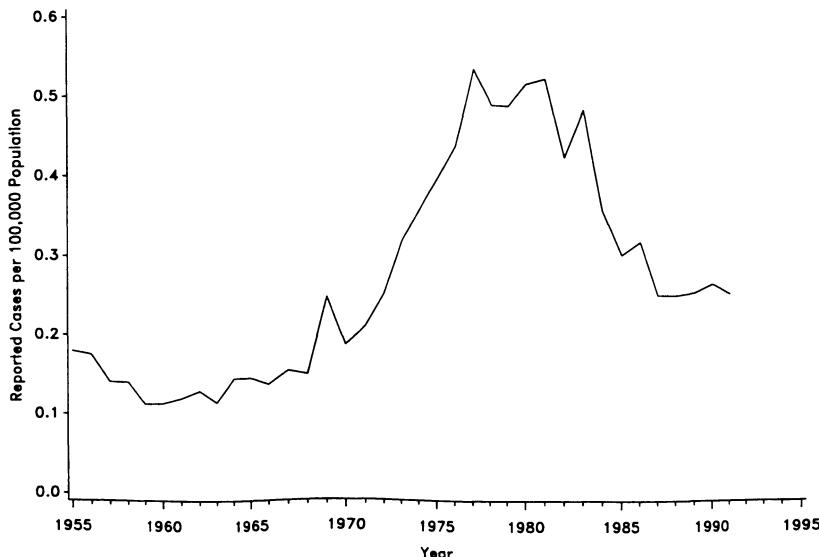

RABIES – Wild and domestic animals, by year, United States and Puerto Rico, 1955–1991

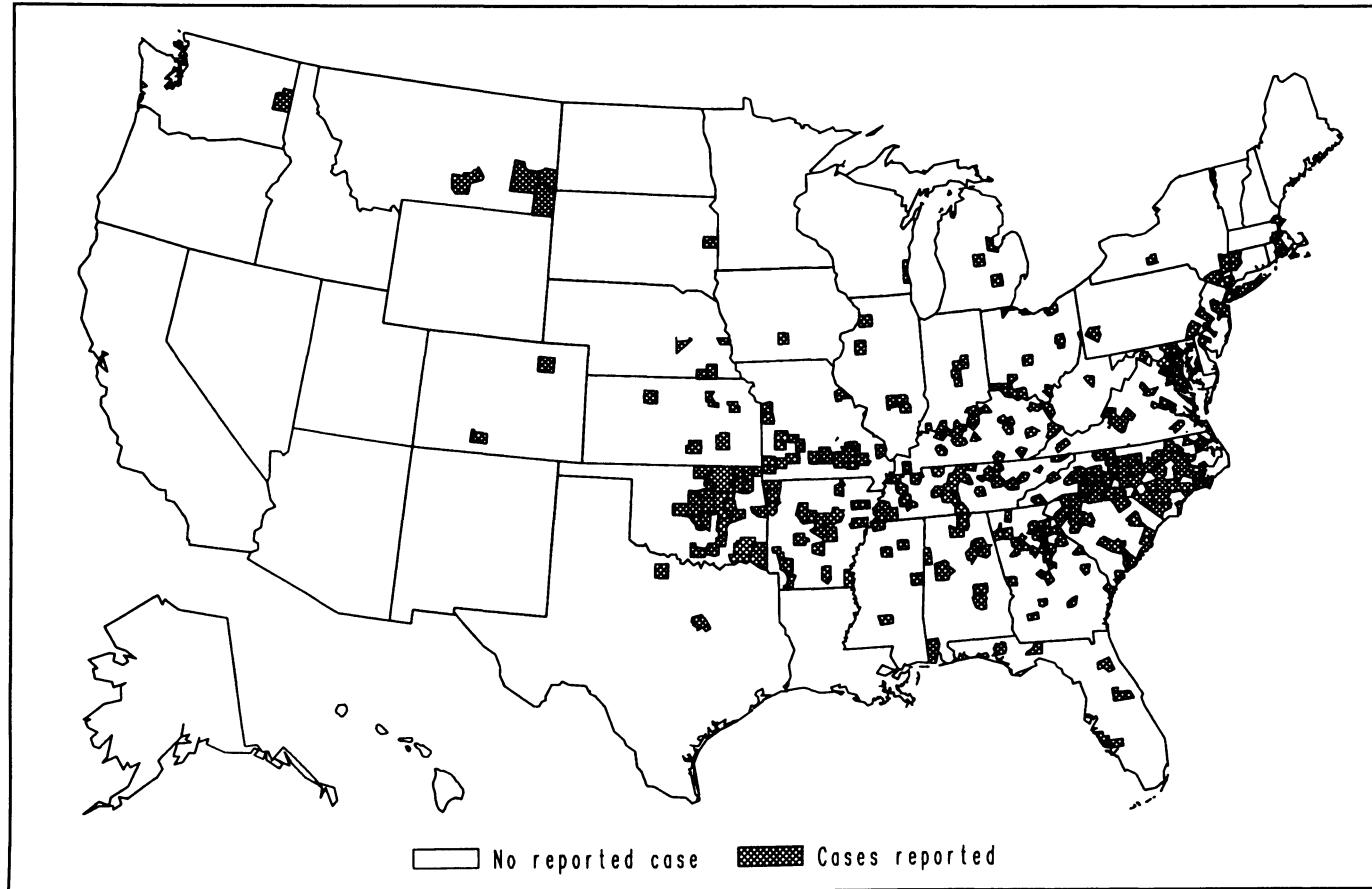

RHEUMATIC FEVER – Reported cases, United States, 1991

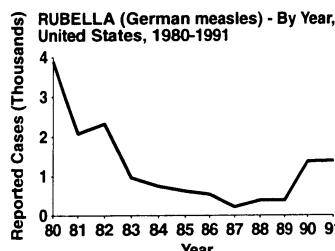

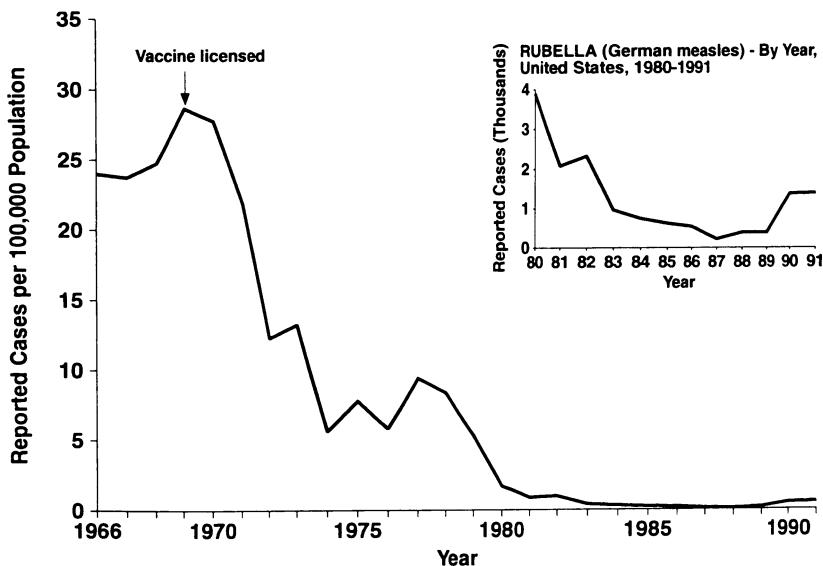

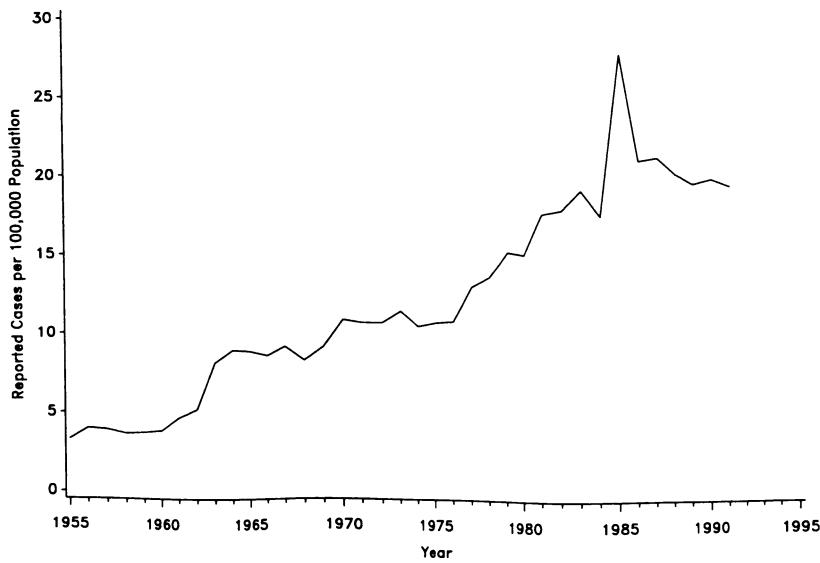

ROCKY MOUNTAIN SPOTTED FEVER – By year, United States, 1955–1991

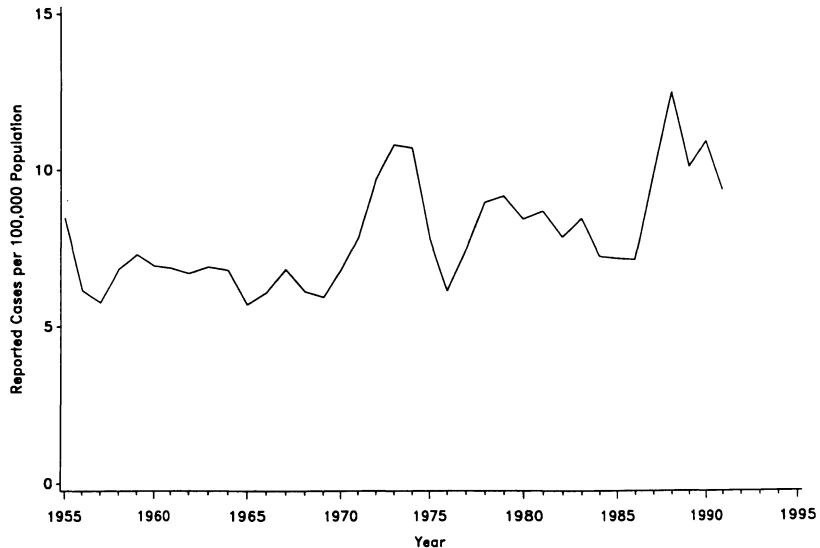

ROCKY MOUNTAIN SPOTTED FEVER – Counties reporting cases, United States, 1991

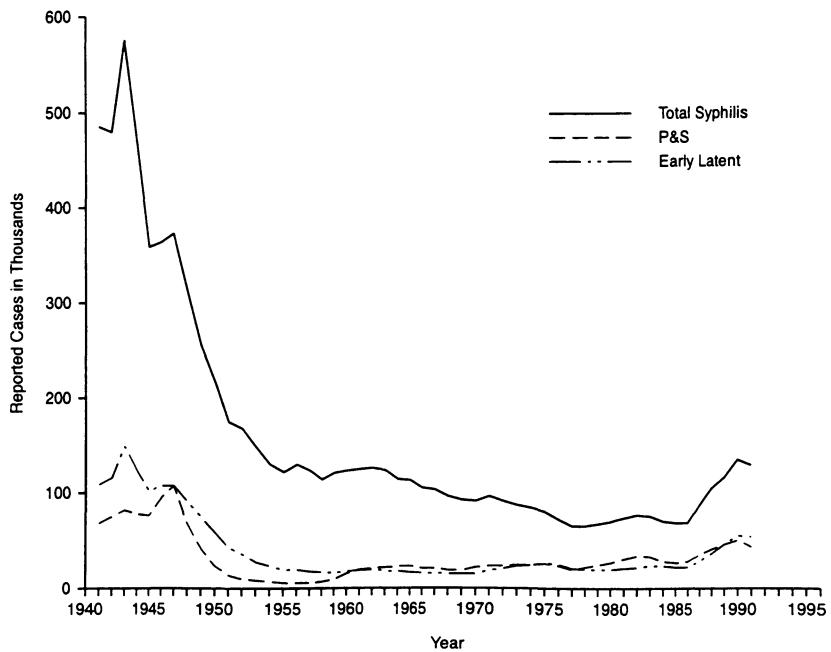

RUBELLA (German measles) – By year, United States, 1966–1991**SALMONELLOPSIS (excluding typhoid fever) – By year, United States, 1955–1991**

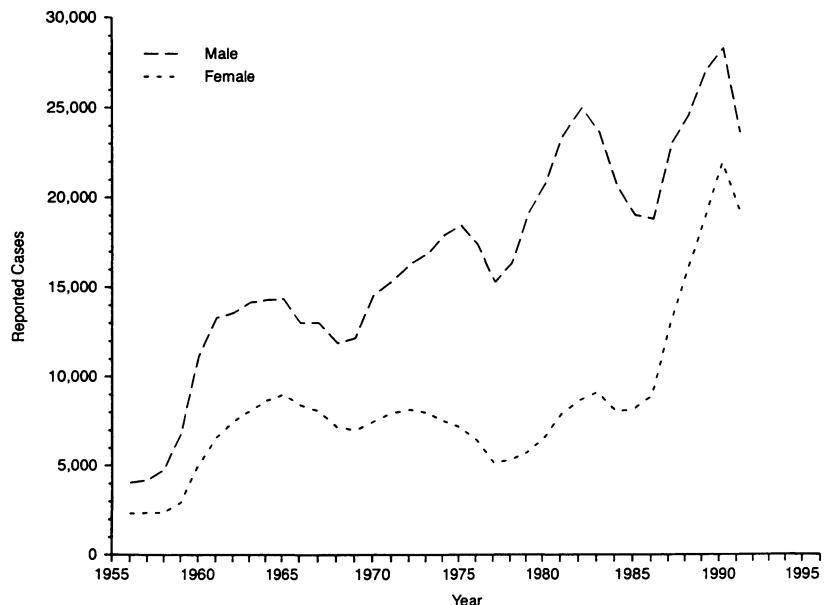

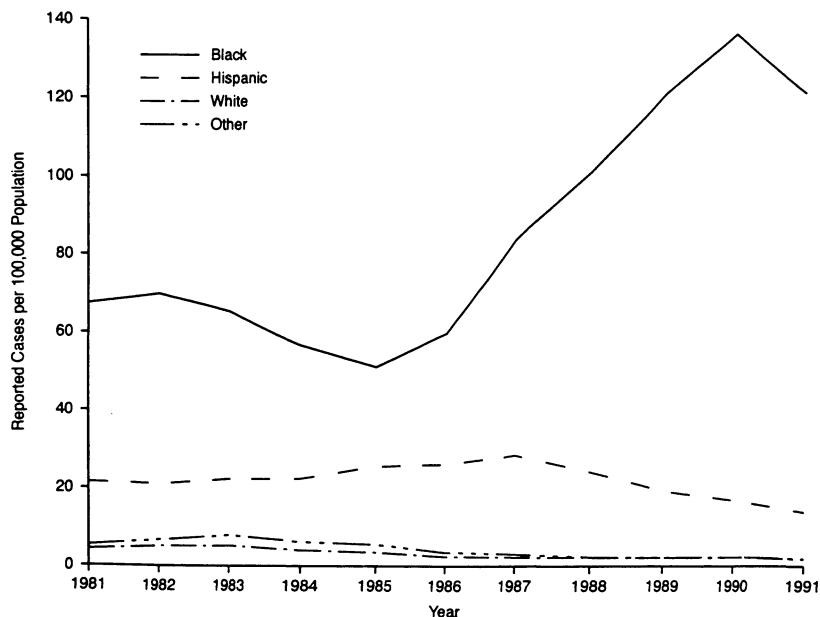

GRAPHS AND MAPS

SHIGELLOSIS – By year, United States, 1955–1991

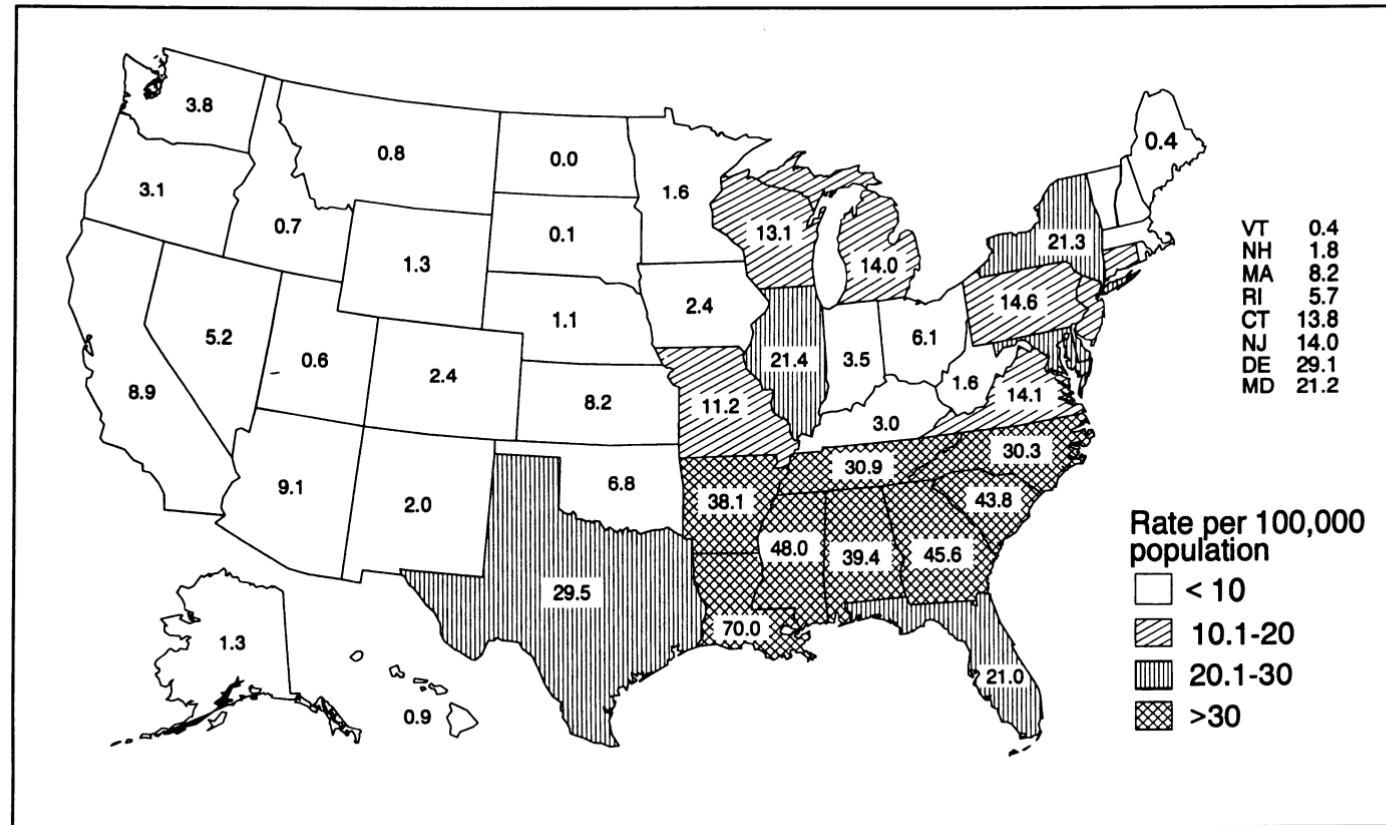

SYPHILIS – By year, United States, 1941–1991

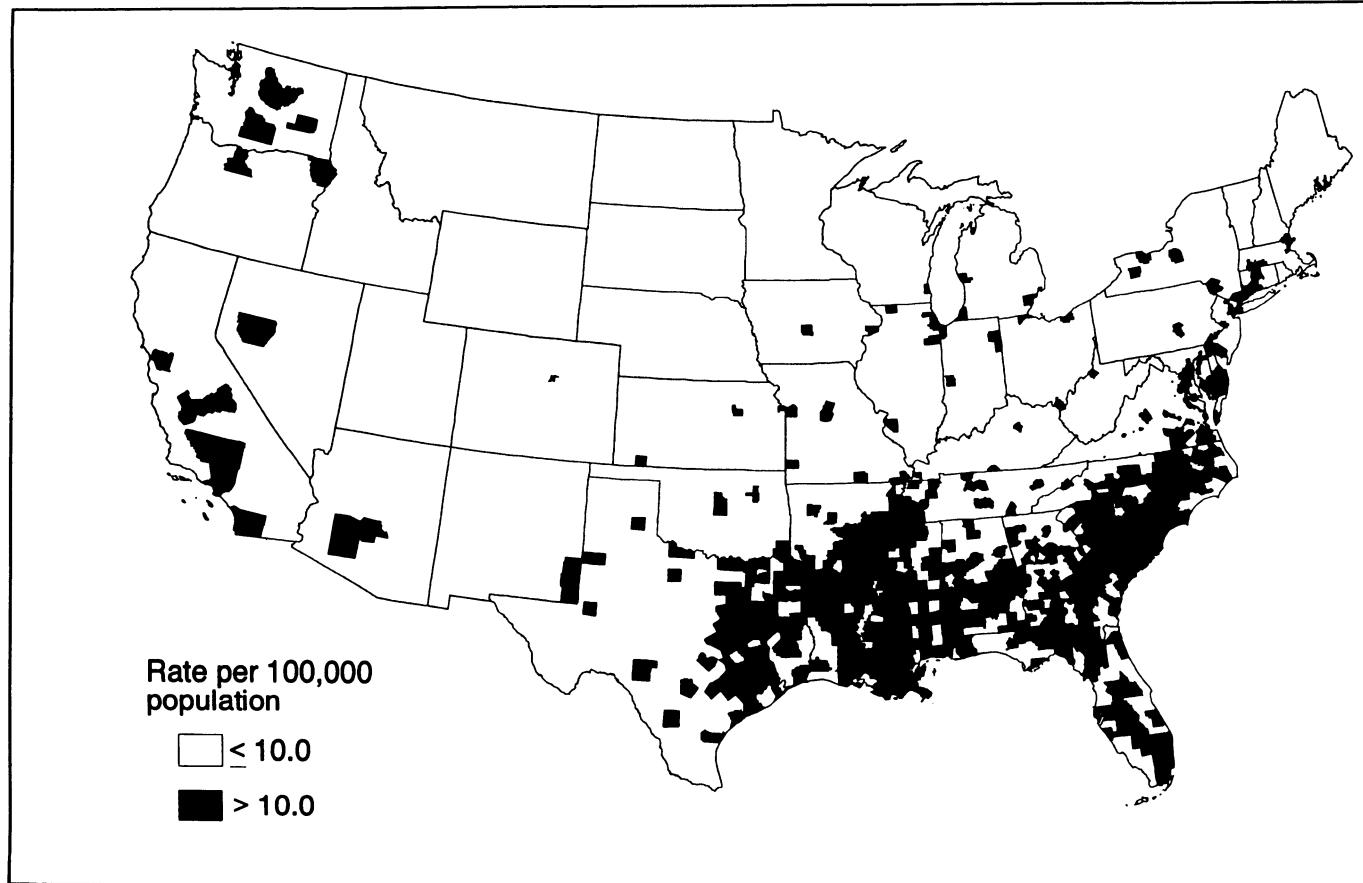

SYPHILIS (primary and secondary) — By sex, United States, 1956–1991**SYPHILIS (primary and secondary) — By race and ethnicity, United States, 1981–1991**

SYPHILIS (primary and secondary) – By state, United States, 1991

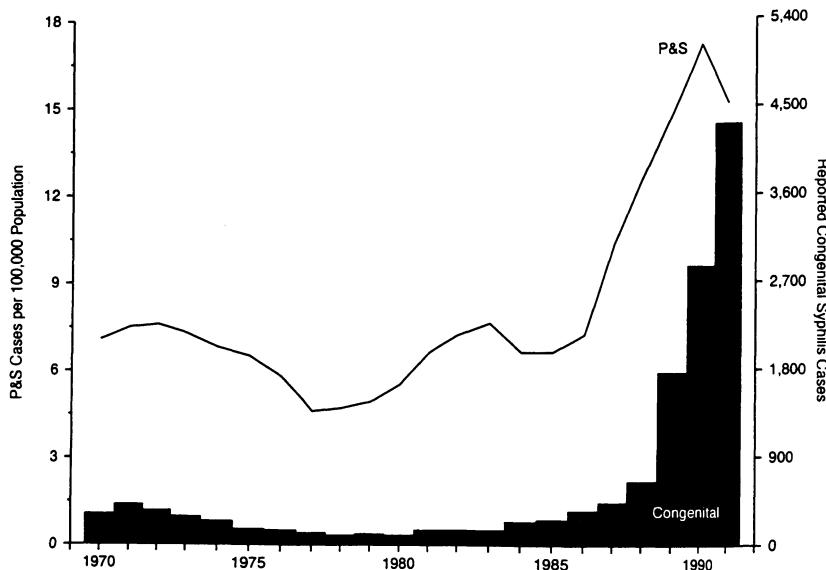

NOTE: The total rate of primary and secondary syphilis for the U.S. was 17.3 per 100,000 population. The year 2000 objective is 10.0 per 100,000 population.

SYPHILIS (primary and secondary) — Counties with rates above and below the year 2000 objective, United States, 1991

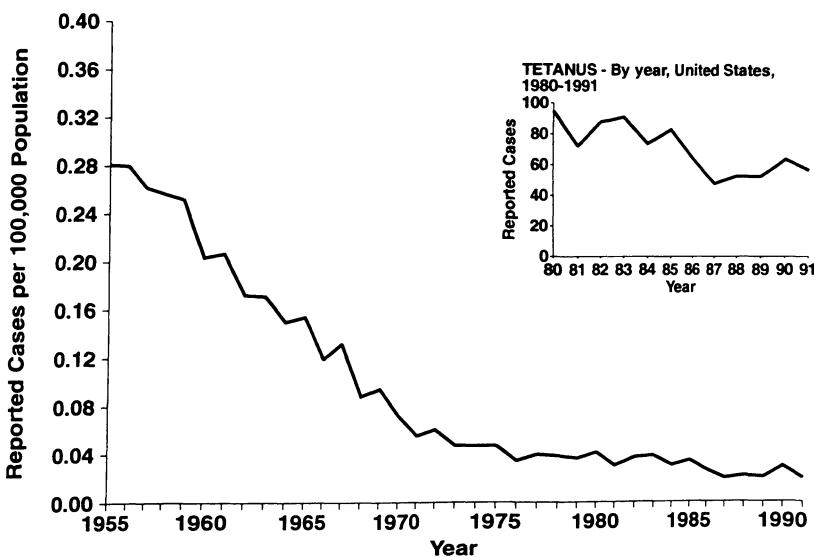

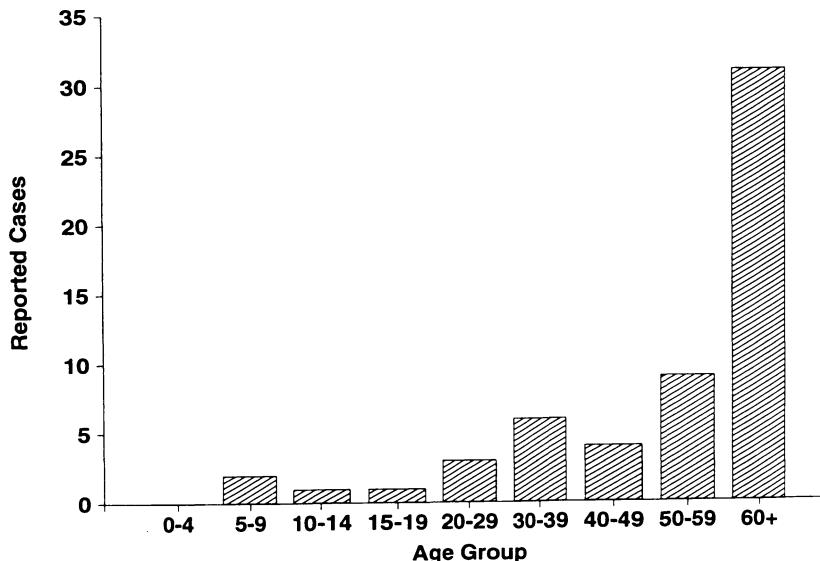

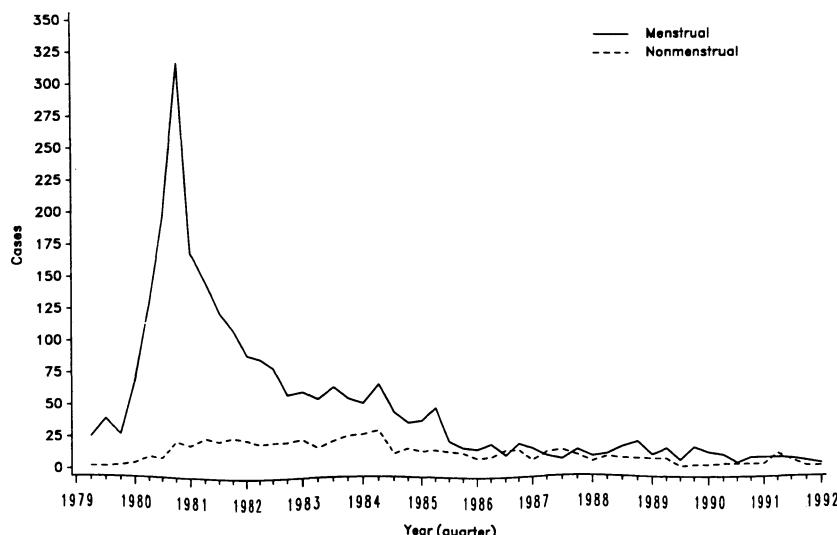

GRAPHS AND MAPS

SYPHILIS – Congenital (under 1 year) and primary and secondary (P&S) among women, United States, 1970–1991

TETANUS – By year, United States, 1955–1991

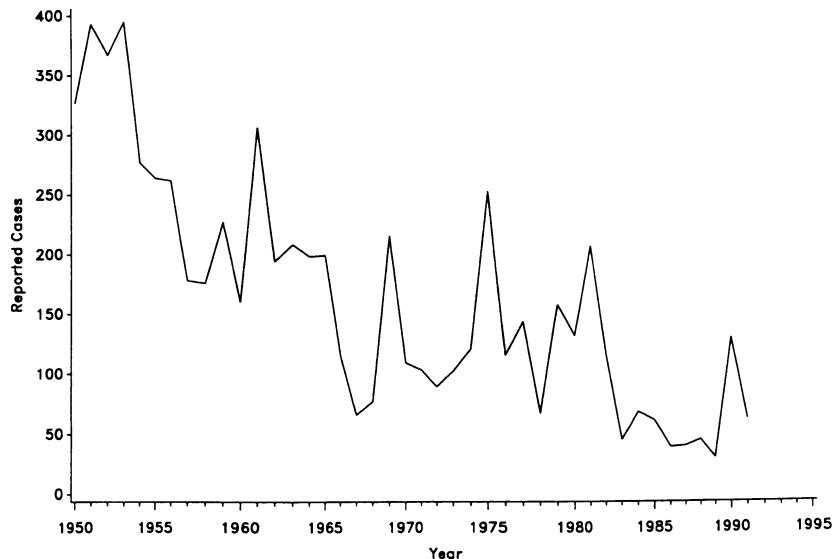

TETANUS — By age group, United States, 1991**TOXIC-SHOCK SYNDROME — By quarter, United States, 1979–1991***

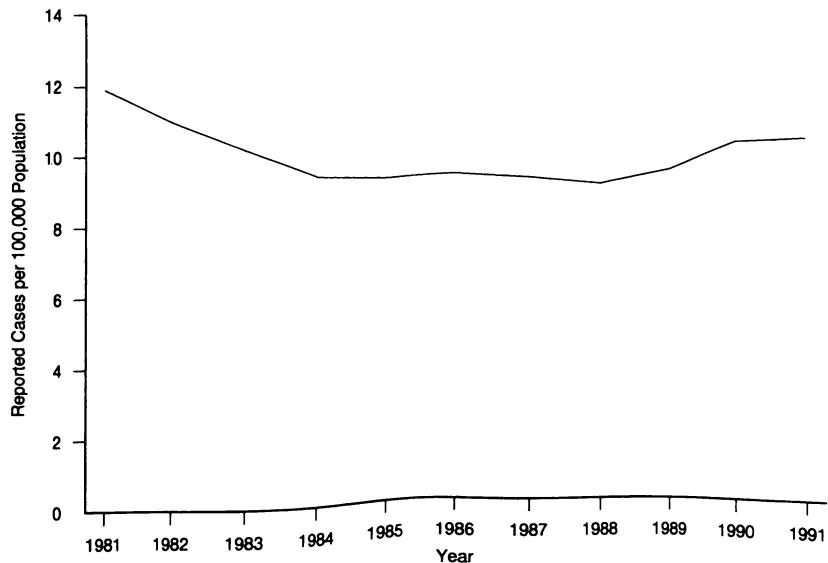

*Includes only cases meeting the CDC case definition. (N = 3172)

GRAPHS AND MAPS

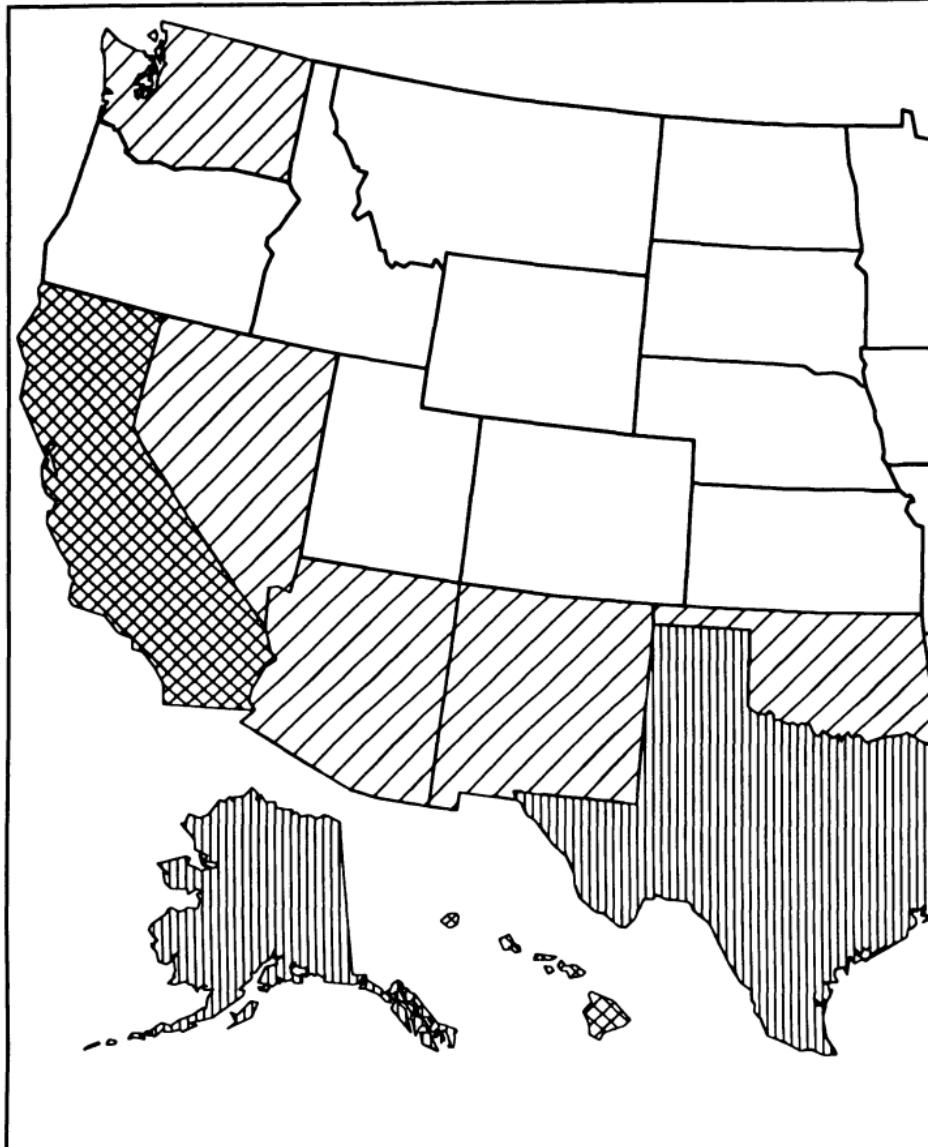

TRICHINOSIS – By year, United States, 1950–1991

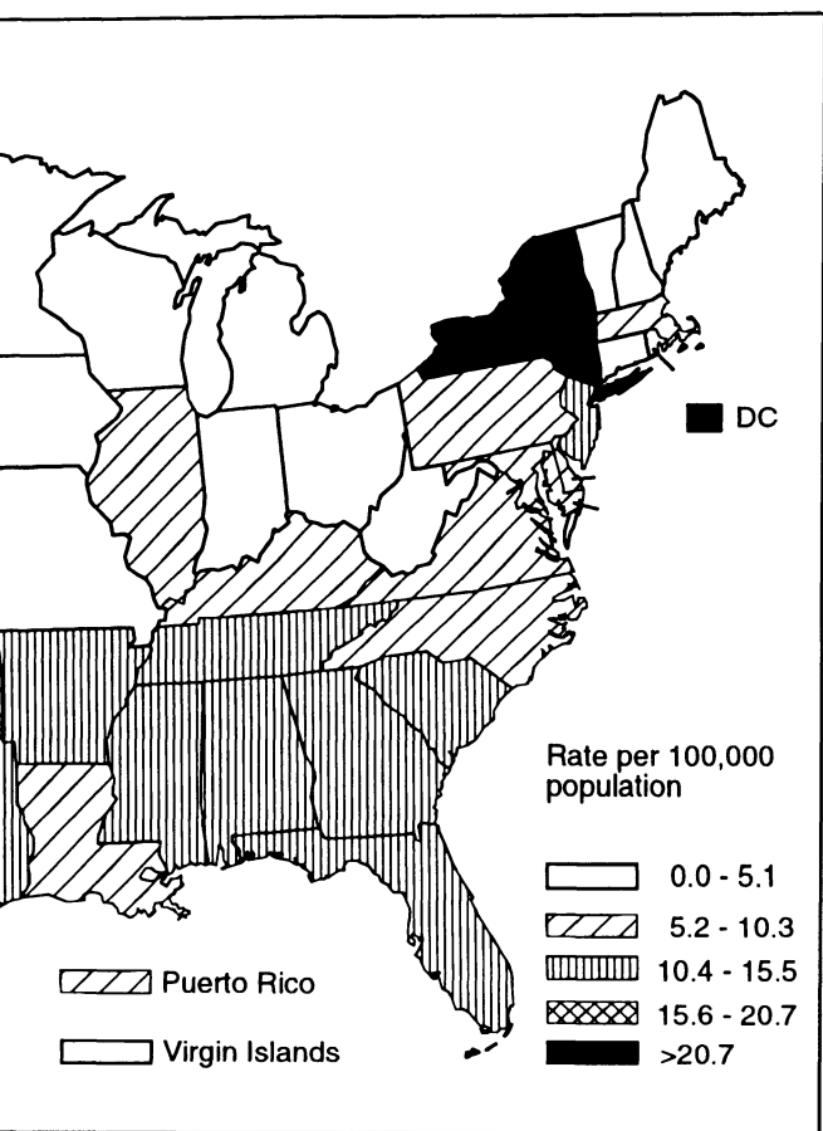

TUBERCULOSIS – By year, United States, 1981–1991

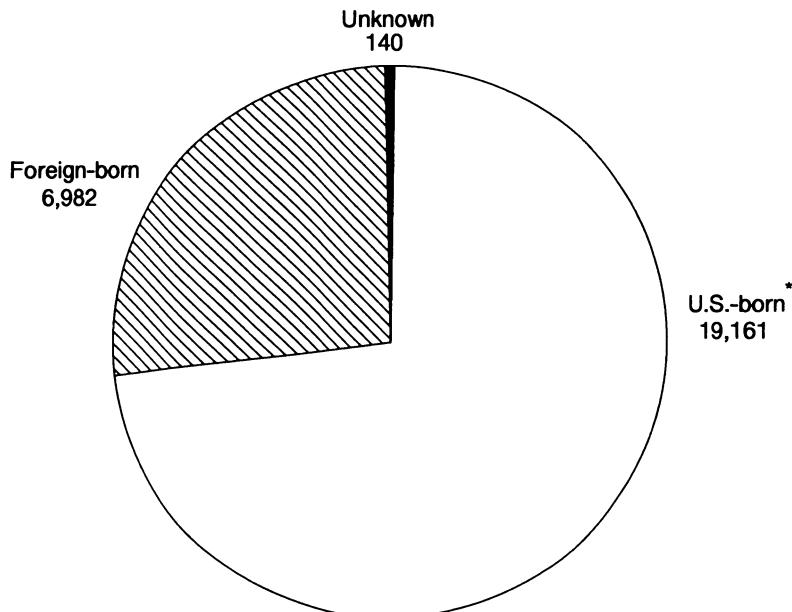

TUBERCULOSIS — Rates by state, United States, 1991

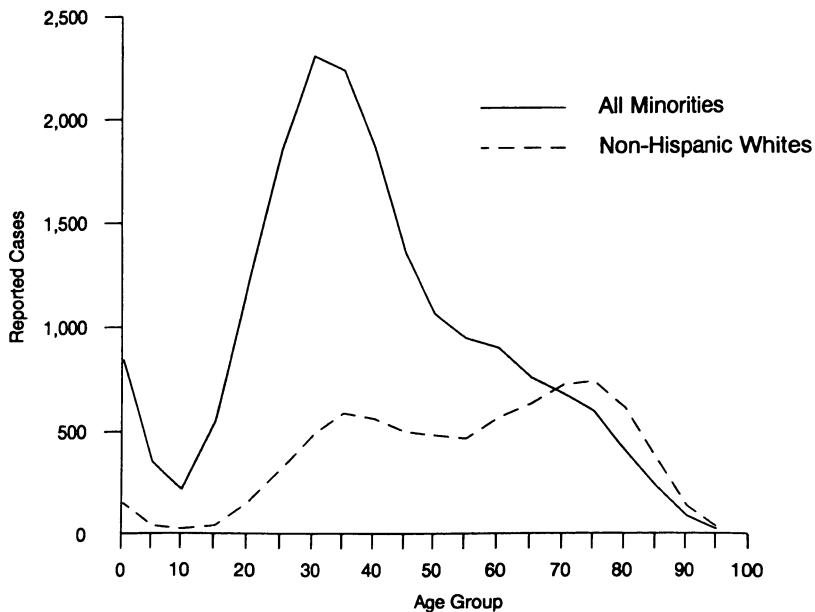

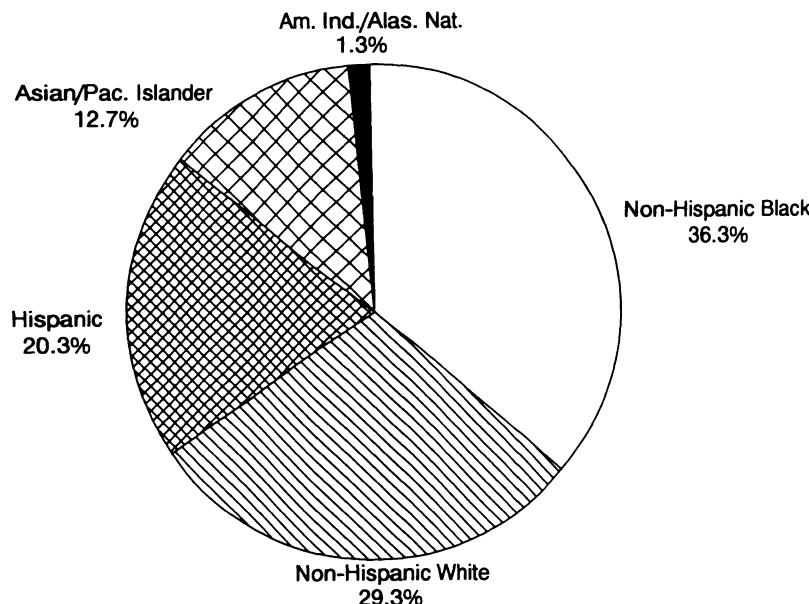

GRAPHS AND MAPS

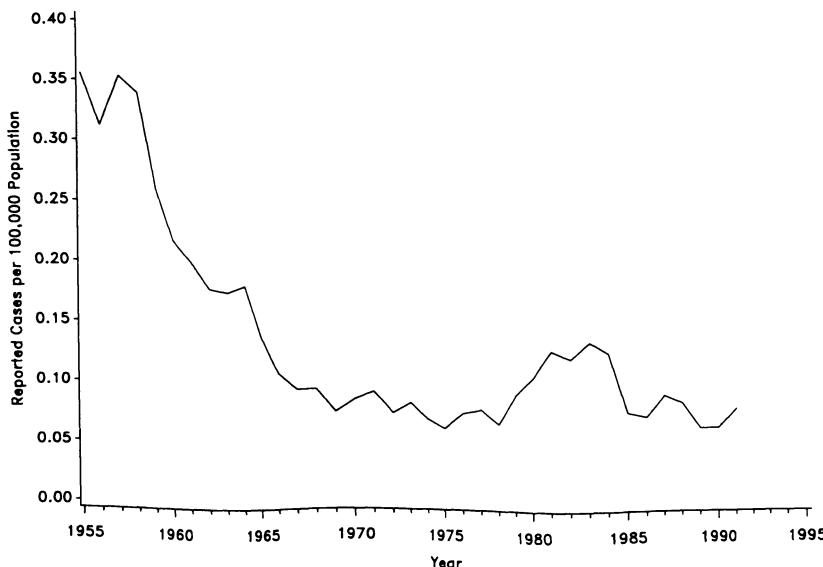

TUBERCULOSIS – Cases, United States-born and foreign-born, 1991

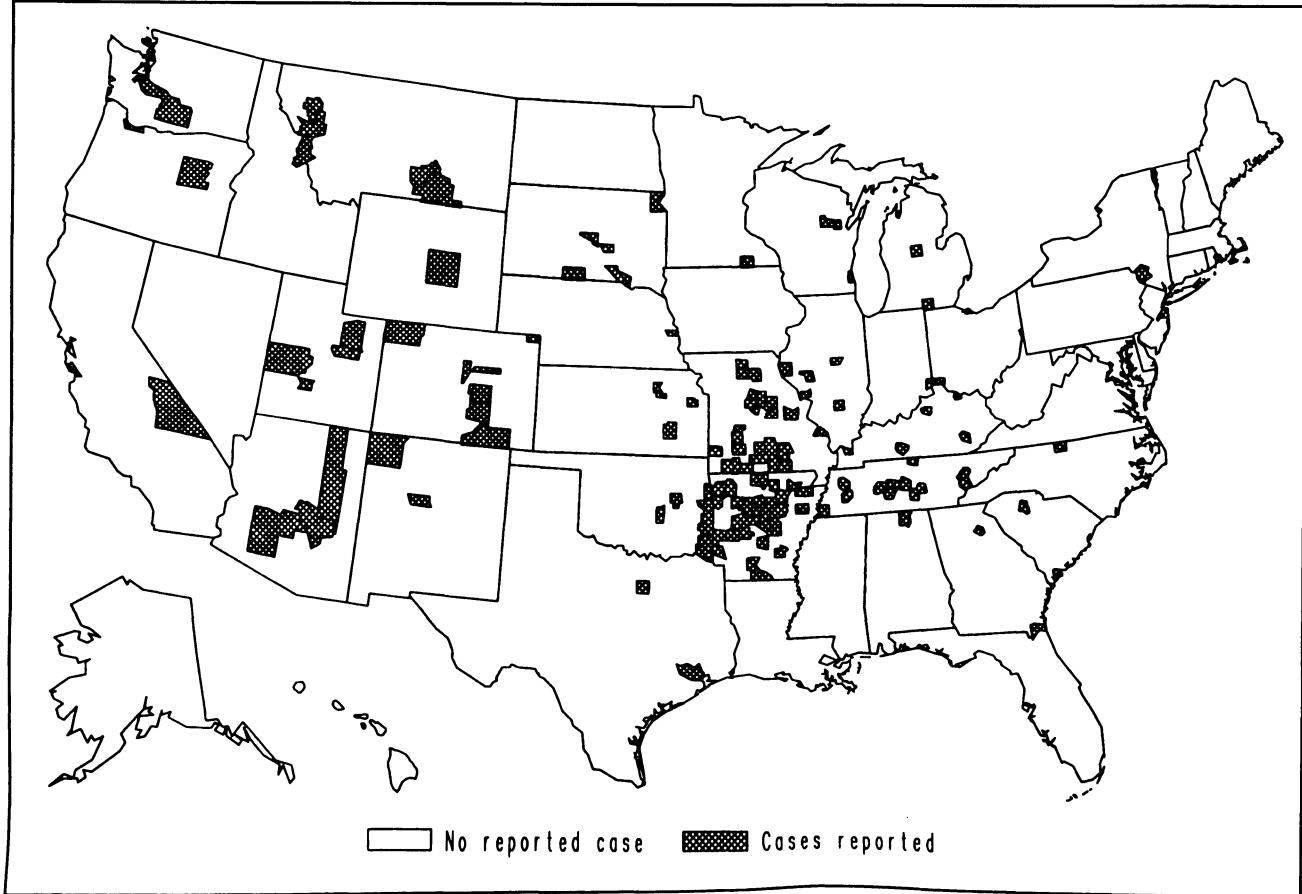

*Includes Puerto Rico-born cases.

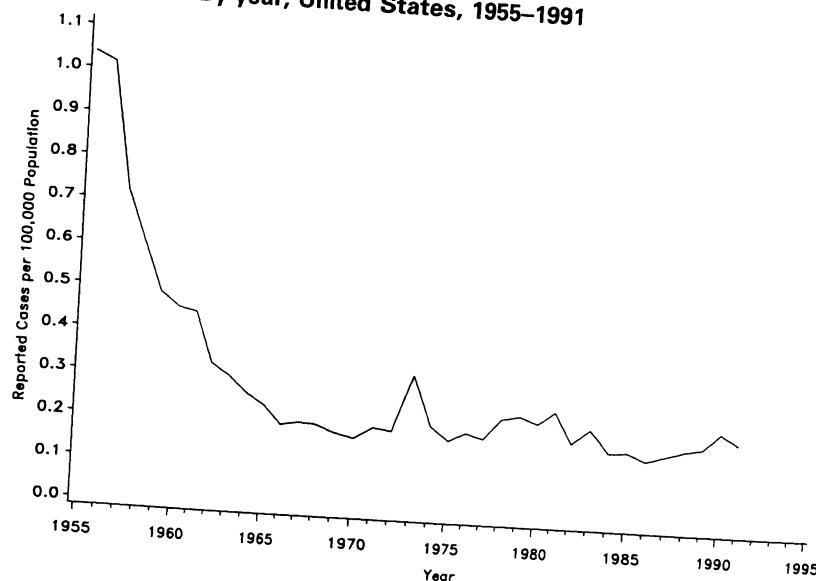

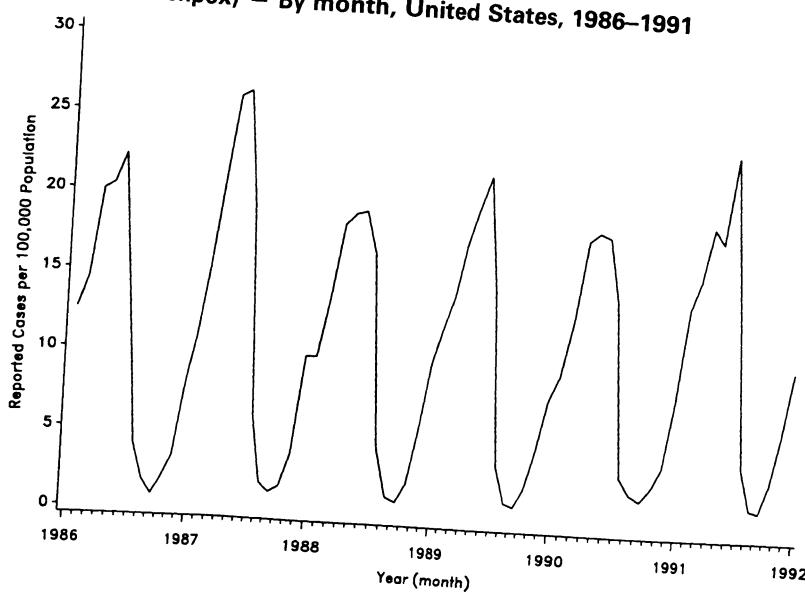

TUBERCULOSIS – Frequency distribution of cases by age, race, and ethnicity, United States, 1991

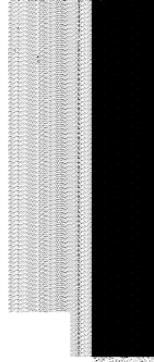

TUBERCULOSIS — Percentages of cases by race and ethnicity, United States, 1991

Excludes 17 cases (0.1%) with race/ethnicity unknown.

TULAREMIA — By year, United States, 1955–1991

TULAREMIA – Counties reporting cases, United States, 1991

TYPHOID FEVER — By year, United States, 1955–1991**VARICELLA (chickenpox) — By month, United States, 1986–1991**

卷之三

PART 3

Historical Summary Tables

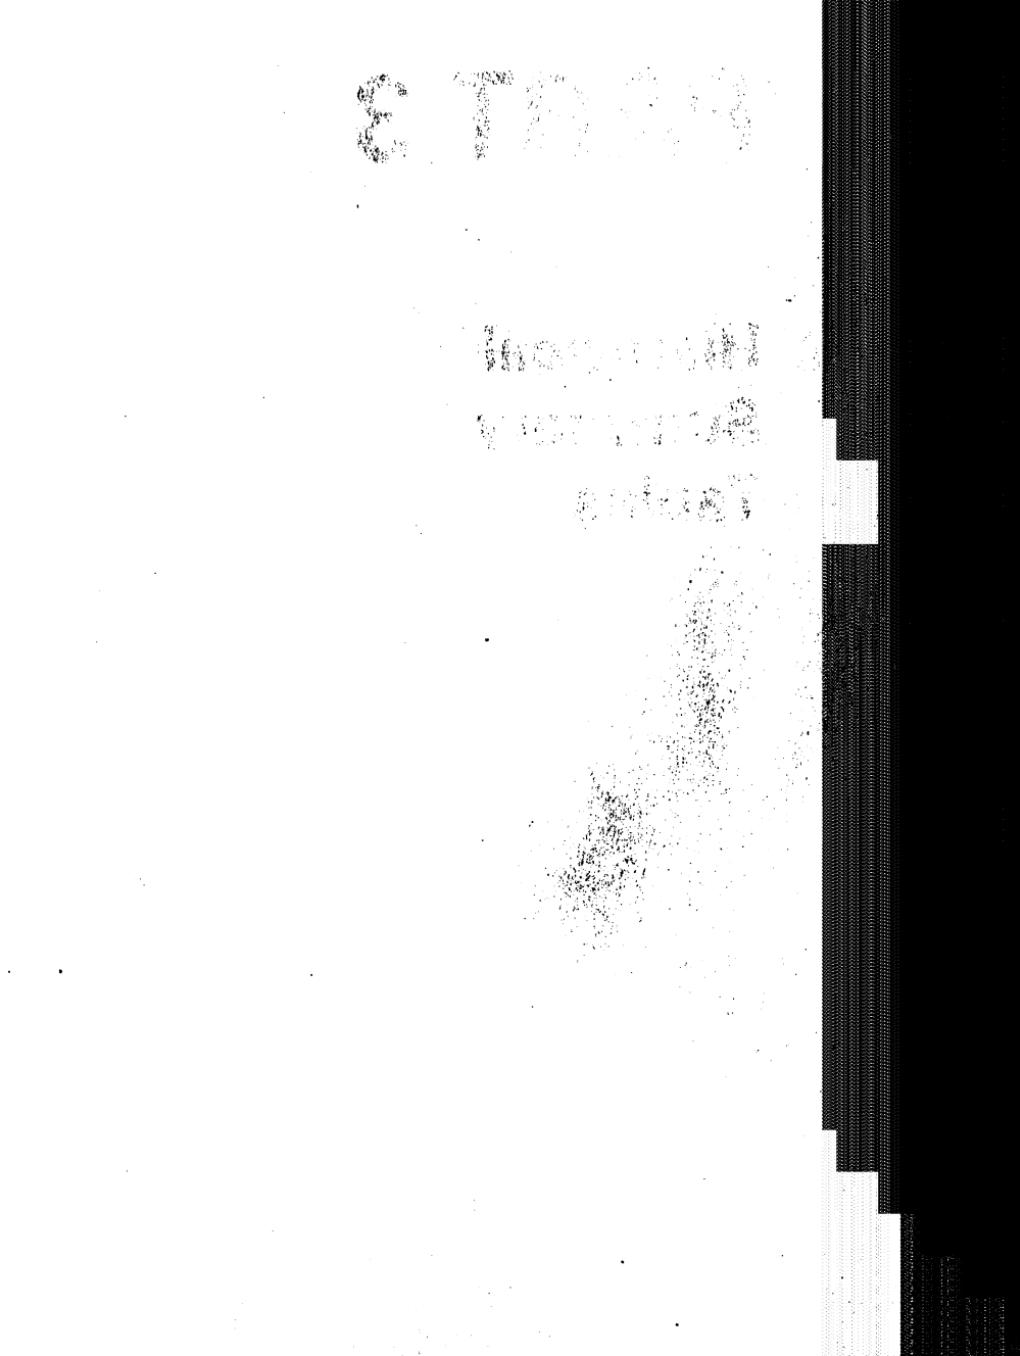

TABLE 1. NOTIFIABLE DISEASES – Summary of reported cases, United States, 1982–1991

Yellow fever

*Not previously notifiable nationally.

†Data for 1984–1991 reflects change in categories for tabulating encephalitis reports which were recorded by date of report to state health departments. Data for previous years are from surveillance records reported by onset date.

‡Reports from New York City are not available.

**Data for 1982–1991 recorded by date of report to state health department. Data for all previous years are from surveillance records reported by onset date.

**Annual case reports from state health departments; numbers may not reflect changes based on retrospective case evaluations or late reports (see MMWR 1986;35:180–182).

Yellow fever	Last indigenous case reported 1911; last imported, 1924

Note: Rates less than 0.01 after rounding are shown as 0.00.

Population data from those states where diseases were not notifiable (NN) or not available (NA) were excluded from rate calculation. Data from the 1990 Census of resident population of states and territories were used to calculate rates for chancroid, gonorrhea, granuloma inguinale, lymphogranuloma venereum, and syphilis.

*Not previously notifiable nationally.

†Per 1,000 live births.

*For 1983-1986, deaths are estimated from death certificates with mention of conditions coded to deficiency of cell-mediated immunity (ICD-9 No. 279.1). Includes other human immunodeficiency virus (HIV)-related deaths and other diseases classifiable as deficiency of cell-mediated immunity. (The asterisks in the ICD column pertain to the ICD code, not a footnote.)

†Arthropod-borne encephalitis and other non-anthropod-borne viral diseases of the central nervous system.

Source: National Center for Health Statistics, CDC, National Vital Statistics System, 1980-1989. Deaths are classified according to the Ninth Revision, ICD.

State and Territorial Epidemiologists and Laboratory Directors

State and Territorial Epidemiologists and Laboratory Directors are gratefully acknowledged for their contributions to this report. The epidemiologists listed below were in the positions shown as of September 4, 1992, and the laboratory directors listed below were in the positions shown as of July 21, 1992.

State/Territory	Epidemiologist	Laboratory Director
Alabama	Charles H. Woernle, MD, MPH	William J. Callan, PhD
Alaska	John P. Middaugh, MD	Katherine A. Kelley, DrPH
Arizona	Larry Sands, DO, MPH (Acting)	Barbara Erickson, PhD
Arkansas	Thomas C. McChesney, DVM	Robert L. Horn
California	George W. Rutherford, MD	Michael G. Volz, PhD
Colorado	Richard E. Hoffman, MD, MPH	Ronald L. Cada, DrPH
Connecticut	James L. Hadler, MD, MPH	Sanders Hawkins, PhD
Delaware	LeRoy A. Hatchcock, Jr., PhD	Mahadeo P. Verma, PhD
District of Columbia	Martin E. Levy, MD, MPH	James B. Thomas, ScD
Florida	Richard S. Hopkins, MD, MSPH	Eldert C. Hartwig, ScD
Georgia	Joseph A. Wilber, MD	Elizabeth A. Franko, PhD
Hawaii	Richard L. Vogt, MD	Vernon K. Miyamoto, PhD
Idaho	Fritz R. Dixon, MD	Richard H. Hudson, PhD
Illinois	Byron J. Francis, MD, MPH	David F. Carpenter, PhD
Indiana	Mary Lou Fleissner, DrPH	Gregory V. Hayes, DrPH
Iowa	Laverne A. Wintermeyer, MD	W. J. Hausler, Jr, PhD
Kansas	Andrew R. Pelletier, MD	Roger H. Carlson, PhD
Kentucky	Reginald Finger, MD, MPH	Thomas E. Maxson, DrPH
Louisiana	Louise McFarland, DrPH	Henry Bradford, Jr, PhD
Maine	Kathleen F. Gensheimer, MD, MPH	Philip W. Haines, DrPH
Maryland	Ebenezer Israel, MD, MPH	J. Mehsen Joseph, PhD
Massachusetts	Alfred DeMaria, Jr, MD	Ralph J. Timperi, MPH
Michigan	Kenneth R. Wilcox, Jr, MD, DrPH	Robert Martin, DrPH
Minnesota	Michael T. Osterholm, PhD, MPH	Pauline Bouchard, JD, MPH
Mississippi	F. E. Thompson, Jr, MD, MPH	R. H. Andrews, MPH
Missouri	H. Denny Donnell, Jr, MD, MPH	Eric C. Blank, DrPH
Montana	Todd Damrow, PhD, MPH	Douglas Abbott, PhD
Nebraska	Thomas J. Safranek, MD	John Blosser
Nevada	Debra Brus, DVM	Arthur F. DiSalvo, MD
New Hampshire	M. Geoffrey Smith, MD, MPH	Veronica C. Malmberg
New Jersey	Kenneth C. Spitalny, MD	Shahiedy I. Shahid, PhD
New Mexico	C. Mack Sewell, DrPH, MS	Loris W. Hughes, PhD
New York City	Kenneth R. Ong, MD	Stanley Reimer
New York State	Guthrie Birkhead, MD, MPH (Acting)	Lawrence Sturman, MD, PhD
North Carolina	J. Newton MacCormack, MD, MPH	Samuel N. Merritt, DrPH
North Dakota	Larry Shireley, MS, MPH	James L. Pearson, DrPH
Ohio	Thomas J. Halpin, MD, MPH	Thomas J. Halpin, MD, MPH (Acting)
Oklahoma	Paul Zenker, MD, MPH	Garry L. McKee, PhD
Oregon	David Fleming, MD (Acting)	Charles D. Brokopp, DrPH
Pennsylvania	Dale R. Tavris, MD, MPH	Bruce Kieger, DrPH (Acting)
Rhode Island	Bela Matyas, MD, MPH	Walter S. Combs, PhD

South Dakota	Kenneth A. Senger	Kathleen L. Meckstroth, DrPH
Tennessee	Robert H. Hutcheson, MD, MPH	Michael W. Kimberly, DrPH
Texas	Diane M. Simpson, MD, PhD	Charles E. Sweet, DrPH
Utah	Craig R. Nichols, MPA	A. Richard Melton, DrPH
Vermont	Robert Houseknecht, PhD	Burton W. Wilcke, Jr, PhD
Virginia	Grayson B. Miller, Jr, MD	Vacant
Washington	John M. Kobayashi, MD, MPH	Jon M. Counts, DrPH
West Virginia	Loretta E. Haddy, MA, MS	Frank W. Lambert, Jr, DrPH
Wisconsin	Jeffrey P. Davis, MD	Ronald H. Laessig, PhD
Wyoming	Stanley I. Music, MD, DTPH	Carl H. Blank, DrPH
American Samoa	Julia L. Lyons, MD, MPH	Vacant
Federated States of Micronesia	Steven Auerbach, MD, MPH	Vacant
Guam	Robert L. Haddock, DVM, MPH	Arthur J. Loerzel, MD
Marshall Islands	Tony de Brum	Vacant
Northern Mariana Islands	Sean P. Flood, MD, MPH	Vacant
Palau	Yugi Mesubed, MO	Vacant
Puerto Rico	John V. Rullan, MD, MPH	Raul Armstrong, DVM
Virgin Islands	Alfred O. Heath, MD (Acting)	Norbert Mantor, PhD

The *Morbidity and Mortality Weekly Report (MMWR)* Series is prepared by the Centers for Disease Control and is available on a paid subscription basis from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402; telephone (202) 783-3238.

The data in the weekly *MMWR* are provisional, based on weekly reports to CDC by state health departments. The reporting week concludes at close of business on Friday; compiled data on a national basis are officially released to the public on the succeeding Friday. Inquiries about the *MMWR* Series, including material to be considered for publication, should be directed to: Editor, *MMWR* Series, Mailstop C-08, Centers for Disease Control, Atlanta, GA 30333; telephone (404) 332-4555.
